**Definitions**

TNC Analysis:

Stream/ River is listed as a priority under a TNC ecoregional or aquatic analysis, or is a major branch/fork of the listed stream river and is contained within the TNC priority area.

SGCN Occurrence:

At least two species in greatest conservation need reported occurring along stream/river (at 1:100,000 resolution). It is not required that SCGN occurrences are along the stream/river reach within the subsection, but can be anywhere along the stream/river reach.
