SNA Bird Checklist Sp Su Fa Wi

This checklist contains the names of all birds that have been documented at this site by reliable observers, including principal observer Bob Janssen, MOU records, and data contained in research reports. Checklist layout by Jennifer Lintelmann. Persons interested in the sources used in preparation of this list may contact Project Supervisor/Nongame Specialist Katie Haws at 218-308-2641.

For more information contact DNR Information Center, 500 Lafayette Rd. St. Paul, MN 55155-4040 651-296-6157 or toll-free 888-MIN-NDNR (646-6367).

Equal opportunity to participate in and benefit from programs of the Minnesota Department of Natural Resources is available to all individuals regardless of race, color, creed, religion, national origin, sex, marital status, status with regard to public assistance, age, sexual orientation, membership or activity in a local commission, or disability. Discrimination inquiries should be sent to the Minnesota Department of Natural Resources, 500 Lafayette Road, St. Paul, MN 55155-4031; or the Equal Opportunity Office, Department of the Interior, Washington, D.C. 20240.

This document is available in alternative formats to individuals with disabilities by calling 651-296-6157

Taxonomy, Season and Abundance Key

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January, 2005) prepared by the Minnesota Ornithological Union (MOU) Records Committee.

The seasons in the checklist are defined as follows:

Sp (Spring) = March, April, May
Su (Summer) = June, July
Fa (Fall) = August, September, October, November
Wi (Winter) = December, January, February

Abundance codes are defined as follows:

C = Common — present, relatively easy to find
U = Uncommon — observed, may be difficult to find
O = Occasional — may or may not be present in any year
R = Rare — has occurred at least once, may recur
Birding Opportunities at Myhr Creek Ridge SNA

Myhr Creek Ridge SNA straddles a four-square mile bedrock hill overlooking Lake Superior. This newly established SNA is located in Cook County, 1.7 miles W. of Hovland. The area consists of dense mixed coniferous and deciduous forest interspersed with wetlands and a ridge of jack pine in the southern portion of the SNA. The site is one of the few examples of fire dependant native plant communities present along the North Shore.

Forty-five species of birds have been recorded at the site. Unique species include Solitary Sandpiper which was seen in late May 2010. This observation probably indicates nesting in the area of this rare breeding species in Minnesota. Black-backed Woodpecker, a pine-associated species, was also seen on the unit. Twelve species of warblers were recorded on the site, the majority of which were most likely potential breeders on the SNA. Black-throated Green Warblers were especially common. Ruffed Grouse were well represented in the area with several broods of young observed. Black-capped Chickadees and Red-breasted Nuthatches were common on the SNA.

Access is gained from County Road 69 (North Road), although because of the steep terrain and pristine forest conditions one must be prepared for remote exploration. The boundary of the unit is posted.
