

An aerial photograph of a forested area, likely a Special Natural Area (SNA), in 1938. The image is in black and white. A cyan-colored outline highlights the boundary of the Swede Forest SNA. The forest is dense and appears to be a mix of tree types. There are several small, dark, irregularly shaped ponds or wetlands scattered throughout the forested area. The surrounding landscape is less dense, with some open fields or roads visible. A yellow text box in the upper right corner contains the text "Swede Forest SNA 1938".
