

An aerial photograph of a forested area, likely a Special Natural Area (SNA), in 1938. The image is in black and white. A thick cyan line outlines the boundary of the Swede Forest SNA. The forest is dense and appears to be a mix of tree types. There are several small, dark, irregularly shaped ponds or wetlands scattered throughout the forested area. The surrounding landscape is less dense, with some open fields or roads visible. A yellow rectangular box in the upper right corner contains the text "Swede Forest SNA 1938".

**Swede Forest SNA
1938**

An aerial photograph of a forest landscape. A cyan-colored outline delineates a specific area within the forest. The forest is dense and green, with several irregularly shaped clearings or ponds scattered throughout. The surrounding area includes agricultural fields and a road. A yellow box in the upper right corner contains the text 'Swede Forest SNA 2011'.
