

## Birding Opportunities at Roscoe Prairie

Roscoe Prairie, a small 56 acre site located in Stearns County, Owned by the Nature Conservancy and designated as an SNA. The site makes up in diversity, for what it lacks in size. The unit consists of a variety of habitats including cattail marsh, black-soil prairie, wet swales, sedge meadow and small areas of deciduous trees. 86 bird species have been recorded here. Blue-headed Vireo has occasionally been seen here. Wilson's Snipe, Wilson's Phalarope and Virginia Rail can be seen in the wet swales, while overhead Turkey Vulture, Northern Harriers and Red-tailed Hawk may be visible.

Access and parking is off of the township road that runs south from Stearns County Road 16 along the west edge of the SNA. There are no trails on the SNA and hiking is rather difficult. The Glacial Lakes State Trail, along the south boundary of the SNA, offers easy walking access.

### Taxonomy, Season and Abundance Key

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January, 2005) prepared by the Minnesota Ornithological Union (MOU) Records Committee.

The **seasons** in the checklist are defined as follows:

**Sp** (Spring) = March, April, May

**Su** (Summer) = June, July

**Fa** (Fall) = August, September, October, November

**Wi** (Winter) = December, January, February

**Abundance codes** are defined as follows:

**C** = Common — present, relatively easy to find

**U** = Uncommon — observed, may be difficult to find

**O** = Occasional — may or may not be present in any year

**R** = Rare — has occurred at least once, may recur

MINNESOTA'S  
WILD & RARE

*Tomorrow's Habitat for the Wild and Rare* is the state's conservation action plan for protecting Minnesota's native animal species that are rare or likely to become rare in the near future.
