Birding Opportunities at Camden State Park

Located in a beautiful wooded valley of the Redwood River, Camden State Park is an oasis in an area of intensive agriculture. The park provides woodland and prairie habitat for a wide variety of birds. Seventeen species of warblers, plus many species of thrush, flycatchers, swallows and sparrows utilize the park. The wooded hillsides are habitat for a large and thriving wild turkey population. The nearby Black Rush Marsh Wildlife Management Area attracts a large number of waterfowl and other waterbirds, including one of the largest breeding colonies of yellow-headed blackbirds in southwestern Minnesota.

Season and Abundance Key

The **seasons** in the checklist are defined as follows:

Sp (Spring) = March, April, May

Su (Summer) = June, July

Fa (Fall) = August, September, October, November

Wi (Winter) = December, January, February

Abundance codes are defined as follows:

C = Common — present, relatively easy to find

U = Uncommon — observed, may be difficult to find

O = Occasional — may or may not be present in any year

R = Rare — has occurred at least once, may or may not be expected to recur

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January, 2006), prepared by the Minnesota Ornithological Records Committee.

This checklist contains the names of all birds that have been documented in the park by reliable observers. It was constructed by Robert B. Janssen, Jerry Bonkoski, and the MN DNR-Division of Parks & Recreation using observations of the above, park staff and other observers, as well as Minnesota Ornithologist's Union records and data contained in research reports. If you are interested in the specific sources used for a particular park, contact the Parks Division Resource Management Program Coordinator by telephone at 651-259-5594 or by mail at MN DNR-Parks, 500 Lafayette Road, Box 39, St. Paul, MN 55155-4039.
