# Birding Opportunities at Charles A. Lindbergh State Park

Though only 400 acres, Charles A. Lindbergh State Park contains excellent habitat for birding. Twenty-five species of warblers have been recorded in the park including blue-winged, cerulean and nesting pine warblers. Six miles of hiking trails, many of which parallel Pike Creek and the Mississippi River, provide good access. In the wildlife-rich woodlands, red-shouldered hawks, blue-gray gnatcatchers, wood thrush, barred owl and scarlet tanagers can be found.

## Season and Abundance Key

The **seasons** in the checklist are defined as follows:

**Sp** (Spring) = March, April, May

**Su** (Summer) = June, July

**Fa** (Fall) = August, September, October, November

**Wi** (Winter) = December, January, February

**Abundance codes** are defined as follows:

**C** = Common — present, relatively easy to find

**U** = Uncommon — observed, may be difficult to find

**O** = Occasional — may or may not be present in any year

**R** = Rare — has occurred at least once, may or may not be expected to recur

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January, 2001), prepared by the Minnesota Ornithological Records Committee.

This checklist contains the names of all birds that have been documented in the park by reliable observers. It was constructed by Robert B. Janssen and the MN DNR-Division of Parks & Recreation using observations of Mr. Janssen, park staff and other observers, as well as Minnesota Ornithologist's Union records and data contained in research reports. If you are interested in the specific sources used for a particular park, contact the Parks Division Resource Management Program Coordinator by telephone at 651-297-1158 or by mail at MNDNR-Parks, 500 Lafayette Road, Box 39 St. Paul, MN 55155-4039.
