# Birding Opportunities at Glacial Lakes State Park

Glacial Lakes State Park contains 1,880 acres of varied habitat, excellent for a great number of bird species. Acres of rolling prairie grasslands offer habitat for sparrows including grasshopper, field, clay-colored, vesper and LeContes. Oak woodlands provide prime habitat for migrant warblers, vireos, flycatchers, woodpeckers, owls and wild turkeys. Twenty-two species of neotropical warblers have been recorded in the park. The fact that over 200 species of birds have been recorded in the park and, of these, more than 100 are potential breeders indicates the value of this area to Minnesota bird-life.

## Season and Abundance Key

The **seasons** in the checklist are defined as follows:

**Sp** (Spring) = March, April, May

**Su** (Summer) = June, July

**Fa** (Fall) = August, September, October, November

**Wi** (Winter) = December, January, February

**Abundance codes** are defined as follows:

**C** = Common — present, relatively easy to find

**U** = Uncommon — observed, may be difficult to find

**O** = Occasional — may or may not be present in any year

**R** = Rare — has occurred at least once, may or may not be expected to recur

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January, 2001), prepared by the Minnesota Ornithological Records Committee.

This checklist contains the names of all birds that have been documented in the park by reliable observers. It was constructed by Robert B. Janssen and the MN DNR-Division of Parks & Recreation using observations of Mr. Janssen, park staff and other observers, as well as Minnesota Ornithologist's Union records and data contained in research reports. If you are interested in the specific sources used for a particular park, contact the Parks Division Resource Management Program Coordinator by telephone at 651-297-1158 or by mail at MNDNR-Parks, 500 Lafayette Road, Box 39 St. Paul, MN 55155-4039.
