Birding at Glendalough State Park

The park's diverse habitat includes prairie, oak savannas, hardwood forest, lakes and wetlands that make it a popular birding destination. A staff favorite is to walk the Sunset Lake Trail, a prime destination for waterfowl and soaring hawks.

During migration, large numbers of warblers, vireos, flycatcher, thrushes and sparrows move through the park's woodland and prairie areas. Look for waterfowl, water birds and marsh birds along marshes and the chain of lakes.

Bird Identification Tips

When you observe a bird, make note of at least three characteristics.

Location: Where did you see the bird? (water, forest, feeder, lower branch, tree trunk, etc.)

Body size and shape: Compare to a known bird. (smaller than a...bigger than a...plump like a...slender like a...) Look at tail, legs and bill. (long, short, thick, thin, curved, straight)

Colors and markings: Look on wings, tail, back, belly, rump and head. (stripe above eye, white spot on tail, etc.)

Sounds and movements: How do they act and sound? (travel alone or in groups, in-flight wing position - soaring, flapping, flap and glide, etc.)
