Birding Opportunities at Kilen Woods State Park

The Des Moines River running through Kilen Woods State Park provides a natural migration corridor. Although the park is small, the wooded hillsides and flood plain areas provide excellent nesting, resting and feeding areas. Twenty-five species of neotropical warblers have been recorded in the park. The prairie areas on the uplands provide habitat for grassland birds. The cerulean warbler and Henslows sparrow have been recorded in the park. The 226 species recorded in the park is an outstanding total count, showing the value of small habitat preservation.

Season and Abundance Key

The **seasons** in the checklist are defined as follows:

Sp (Spring) = March, April, May

Su (Summer) = June, July

Fa (Fall) = August, September, October, November

Wi (Winter) = December, January, February

Abundance codes are defined as follows:

C = Common — present, relatively easy to find

U = Uncommon — observed, may be difficult to find

O = Occasional — may or may not be present in any year

R = Rare — has occurred at least once, may or may not be expected to recur

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January, 2001), prepared by the Minnesota Ornithological Records Committee.

This checklist contains the names of all birds that have been documented in the park by reliable observers. It was constructed by Robert B. Janssen, Jerry Bonkoski, and the MN DNR-Division of Parks & Recreation using observations of the above, park staff and other observers, as well as Minnesota Ornithologist's Union records and data contained in research reports. If you are interested in the specific sources used for a particular park, contact the Parks Division Resource Management Program Coordinator by telephone at 651-259-5594 or by mail at MN DNR-Parks, 500 Lafayette Road, Box 39, St. Paul, MN 55155-4039.
