Birding Opportunities at Lake Bemidji State Park

Lake Bemidji State Park offers a wide variety of habitats and trails for birdwatching. One unique experience is the quarter-mile bog boardwalk which winds its way through a boreal bog to Big Bog Lake. This area is rich in northern boreal forest birds including warblers, flycatchers, vireos, thrushes and woodpeckers. Over 25 species of loons, grebes, swans, geese and ducks have been seen on Lake Bemidji itself. With 14 miles of hiking trails and 1688 acres, one can find ample opportunity for excellent birding especially in winter.

Season and Abundance Key

The **seasons** in the checklist are defined as follows:

Sp (Spring) = March, April, May

Su (Summer) = June, July

Fa (Fall) = August, September, October, November

Wi (Winter) = December, January, February

Abundance codes are defined as follows:

C = Common — present, relatively easy to find

U = Uncommon — observed, may be difficult to find

O = Occasional — may or may not be present in any year

R = Rare — has occurred at least once, may or may not be expected to recur

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January, 2001), prepared by the Minnesota Ornithological Records Committee.

This checklist contains the names of all birds that have been documented in the park by reliable observers. It was constructed by Robert B. Janssen and the MN DNR-Division of Parks & Recreation using observations of Mr. Janssen, park staff and other observers, as well as Minnesota Ornithologist's Union records and data contained in research reports. If you are interested in the specific sources used for a particular park, contact the Parks Division Resource Management Program Coordinator by telephone at 651-297-1158 or by mail at MNDNR-Parks, 500 Lafayette Road, Box 39 St. Paul, MN 55155-4039.
