

# Bring your classroom outside

Lake Bemidji State Park stands as an island within a growing community, reflecting the natural landscape. As natural forces shape the landscape, their pattern of change is preserved within the park. Lake Bemidji State Park has many firsthand experiences waiting for your classroom.

**Each year over 30 school groups take advantage of the naturalist-led program opportunities at Lake Bemidji State Park.**

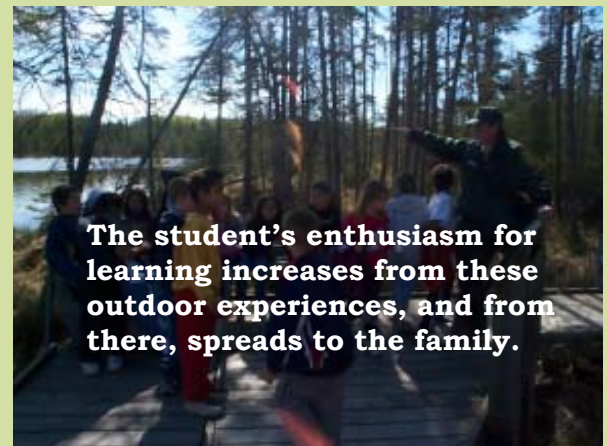

The naturalist will team-teach with you to provide a unique opportunity that is only available through an outdoor experience.

**Students of all ability levels benefit when classroom instruction is enhanced with hands-on field trips and real-life situations.**

## Some topic ideas

- \*Guided Bog Walk
- \*Exploration of Lake Bemidji during the open water season and hard water season (winter)
- \*Snowshoe walks
- \*Maple syrup tapping (odd numbered years)
- \*Minnesota wildlife, plant and tree identification
- \*Climate change programs
- \*Weather and sky observations

**The student's enthusiasm for learning increases from these outdoor experiences, and from there, spreads to the family.**

Contact Lake Bemidji State Park Naturalist John Fylpaa to discuss how to bring your classroom outdoors.
