Checklist created by Robert B. Janssen, Jerry Bonkoski and MNDNR. Data was gathered from MNDNR staff observations, public observations and Minnesota Ornithologist's Union records. Nomenclature and organization of checklist based off of the *Check-list of North American Birds* (7th edition) as currently supplemented.

BIRD CHECKLIST

MAPLEWOOD STATE PARK

Birding at Maplewood State Park

Maplewood State Park contains rolling, wooded hills, lakes, marshes and grasslands. This wide range of habitat provides for an excellent diversity of birdlife. The Hallaway Hill Trail and overlook provide a panoramic view of the park and a great place to observe birds. Waterfowl, gulls and terns congregate on the lakes in the spring and fall. Common loons are found in good numbers on the larger lakes. Of special interest is the presence of red-shouldered hawks in the woodlands. Twenty-five species of Neotropical migratory warblers have been recorded in the park. In August 2005, a Williamson's sapsucker was recorded near the Lake Lida campground.

Key

Occurrence

Sp - Spring (Mar—May)

S - Summer (Jun—Jul)

F - Fall (Aug—Nov)

W - Winter (Dec—Feb)

Abundance

C - Common (Present, relatively easy to find)

U - Uncommon (Present, not certain to be seen)

O - Occasional (Infrequent, may not return each year)

R - Rare (Observed at least once, may not return)

Date: Enter the date you saw the bird.

Bird Identification Tips

When you observe a bird, make note of at least three characteristics.

Location: Where did you see the bird? (water, forest, feeder, lower branch, tree trunk, etc.)

Body size and shape: Compare to a known bird. (smaller than a...bigger than a...plump like a...slender like a...) Look at tail, legs and bill. (long, short, thick, thin, curved, straight)

Colors and markings: Look on wings, tail, back, belly, rump and head. (stripe above eye, white spot on tail, etc.)

Sounds and movements: How do they act and sound? (travel alone or in groups, in-flight wing position - soaring, flapping, flap and glide, etc.)
