Birding Opportunities at William O'Brien State Park

The St. Croix River provides excellent riparian habitat and a natural migration route for numerous bird species. Woodlands provide for wild turkeys, ruffed grouse, and wood thrush and there is excellent edge habitat for eastern towhee and for golden-winged and blue-winged warblers. The park is one of the few places in the state where the range of these two warbler species overlap. Grasslands provide habitat for bobolinks, eastern meadowlarks and sparrows. In addition, there is excellent marsh and pond habitat for species such as swamp sparrow, marsh wren, great egrets, and wood duck. Red-shouldered hawks and prothonotary warblers are also found in the park.

Season and Abundance Key

The **seasons** in the checklist are defined as follows:

Sp (Spring) = March, April, May

Su (Summer) = June, July

Fa (Fall) = August, September, October, November

Wi (Winter) = December, January, February

Abundance codes are defined as follows:

C = Common — present, relatively easy to find

U = Uncommon — observed, may be difficult to find

O = Occasional — may or may not be present in any year

R = Rare — has occurred at least once, may or may not be expected to recur

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January, 2006), prepared by the Minnesota Ornithological Records Committee.

This checklist contains the names of all birds that have been documented in the park by reliable observers. It was constructed by Robert B. Janssen, Jerry Bonkoski, and the MN DNR-Division of Parks & Recreation using observations of the above, park staff and other observers, as well as Minnesota Ornithologist's Union records and data contained in research reports. If you are interested in the specific sources used for a particular park, contact the Parks Division Resource Management Program Coordinator by telephone at 651-259-5594 or by mail at MN DNR-Parks, 500 Lafayette Road, Box 39, St. Paul, MN 55155-4039.
