

Walleye Stocking Continuum for Adaptive Management
Leech Lake Advisory Committee
2010-2015 Management Plan

Risk = Severity of Outcome*Probability of Outcome Occurring

- What are the economic, recreational, and biological risks associated with each of these options? What are the potential benefits?
- What can be learned from the application of each option? How useful will what is learned be to future plans and/or decision-making processes (ie. Adaptive Management)?

Leech Lake Advisory Committee 2010-2015 Management Plan

What are the economic, recreational, and biological risks associated with each option? What are the assumptions? What role does uncertainty play?
