

***Leech Lake Advisory Committee***  
***Flip Chart Notes***  
***2/10/10***

*Next Meeting(s)*

1. Next meeting (10<sup>th</sup>) on 2/22/10 will be expanded from 12 – 4 PM to 10 AM – 4 PM
2. An 11<sup>th</sup> meeting may be held possibly on 3/10/10 dependent on progress made at 2/22/10 meeting.
3. Committee needs to better follow agenda schedule so that management action categories receive sufficient review and discussion (cormorant management, special regulations, habitat management).

*Proposed General Recommendations*

1. Review process: Sampling data from previous field season should be formally reviewed with DNR (Large Lake Biologist and others) and stakeholders annually in February.
2. Need to identify management actions for response to not meeting walleye population objectives.

*Topics for Future Discussion*

1. Evaluation process: Large lake sampling/monitoring approach (methodology) needs to be reviewed.

*Information Requests for Doug and Joe*

LLAC requested the following tables or charts used at the 2/10/10 meeting. These will be provided to the committee either electronically or as a handout at the 2/22/10 meeting.

1. Walleye length/frequency graph
2. Targeted angler pie charts
3. Production data from Woman Lake walleye run for past 15 years
