MAP EXPLANATION

LAND OWNERSHIP
- County Land
- State Forest Land
- State Park and Recreation Land
- State Wildlife Management Area Land
- W.M.A.'s under 40 acres
- State Scientific & Natural Area Land
- S.N.A.'s under 40 acres
- National Waterfowl Production Area
- N.W.P.A.'s under 40 acres
- National Forest, Park, Wildlife Refuge & Recreation Land
- Bureau of Indian Affairs Land

BOUNDARIES
- County Unit Boundary
- State Unit Boundary
- National Unit Boundary

TRAILS AND FOREST ROADS
- State Trail
- State Forest Road

DESIGNATED WATERWAYS
- State Trout Stream
- State Canoe and Boating Route
- State Wild, Scenic & Recreational River (also designated Canoe & Boating Route)
- National Wild, Scenic & Recreational River (also designated Canoe & Boating Route)

FACILITIES
- D.N.R. Office
- Travel Information Center
- Rest Area (with facilities)
- Rest Area (limited facilities)
- Campground
- Watercraft Camping
- Equestrian Camping
- Water Access
- Carry-in Access
- Dam (on designated canoe route)
- Fishing Pier
- Overlook
- Parking
- Historic Site
- Geologic Feature
- Fish Hatchery
- Forestry Nursery
- National Great River Road
- State Great River Road

The PRIM series was developed using funds provided through the Legislative Commission on Minnesota Resources (LCMR).

Base information was compiled from 1:100,000 series U.S. Geologic Survey planimetric maps.

Facility and ownership information was compiled from the following sources: Minnesota Department of Natural Resources, Minnesota Department of Transportation, State Planning Agency, Minnesota Historical Society and the respective counties.

Land ownership categories on this map are in some cases outdated. HCVF sites are on DNR-managed land only; DNR HCVF sites have not been identified on other ownerships.
HCVF Informational Report
Report Run: September 3, 2013

General Information

HCVF #: 800760
HCVF Name: Central Lyons SF
Acres of HCVF site: 3666.89
County: Wadena

Data edited by: Becky Marty, Erik Thorson
Role: NW Reg HCVF Team EWR and Wildlife Representatives
Date edited on: 2013-08-22

Corresponding Land Administrator(s): Forestry
Management Unit Name(s) (if applicable): Lyons State Forest

HCVF Summary

Largest concentration in Minnesota Drift and Lake Plains Section of FDc23a (S1-S2, G2), and 629 acres are natural origin. Also large acreage of rich and poor fens, and sedge meadow; Large population of Cirsium hillii believed to be on state land. State ownership is large, centrally located, and contiguous on level to gently rolling sand.

HCVs known to be present that factored into HCVF designation.
FSC expects DNR to maintain HCVs within designated HCVFs. Because HCVF boundaries are not the same as the larger, multi-ownership MBS Sites, this list will differ from the values identified during the MBS Survey.

EASTERN BROADLEAF FOREST PROVINCE HCVs: 1f (Taxonomic group concentration): birds; 1g (Examples of Outstanding Key Habitats): Upland coniferous forest; 2a - EBF (intact forest block): 3,667 ac; 2b - EBF - (old forest): yes; 2c - EBF (forest block in ag. landscape): yes; 3a (G1 or G2 plant community): FDc23a; 3b (S1 or S2 plant community): FDc12a, FDc23a, FDc24; 3d (Natural origin pine stand): 629 ac.

Management Considerations

Overall management objectives for the entire HCVF:

Region HCVF H4Recommendations - Maintain diverse ground layer especially for bird species and potential rare plant. - Maintain current mix of cover types and age classes across HCVF. - Actively manage rare plant communities to maintain, enhance, and increase where necessary; verify subtypes. - Verify the extent of old forest, NPC/cover type and general location in the HCVF. - Maintain intact nature of the forest block. - Manage to maintain or promote older growth stages.

Management direction from the following sources was considered in developing the above recommendations:
Are the HCVs within this HCVF likely to benefit from coordination with adjacent landowner(s)?
_Yes_

This HCVF was flagged by the Regional HCVF Team as warranting cross-ownership coordination efforts. The specific HCVs likely to benefit from such coordination with adjacent landowners are identified below.

HCV 1f, 1g, 2a, 2b, 2c, 3a, 3b, 3d. Rare species and NPCs likely extend onto adjacent private and industry lands.

General Comments

Multiple SGCN cross the HCVF boundaries. These are most common in the southern and eastern portion of the HCVF.

Reference to rare plants and animals, Minnesota Biological Survey Sites of Biological Significance and mapped native plant communities are records maintained in the Minnesota DNR’s Natural Heritage Information System (NHIS). A date of information is associated with each record. The NHIS is continually updated as new information becomes available. The lack of data listed for any geographic area should not be construed to mean that no significant features are present.
