

Minnesota Special Forest Products Harvest-To-Market Directory

This directory was prepared to better connect the harvesters and the purchasers of Special Forest Products. These products are seeds, burls, herbs, berries, and other (non-timber) raw materials that are gathered from Minnesota's forests and adjacent lands.

The directory doesn't stop here. Your help is needed to spread the word about this directory and broaden its contents. If you'd like to be added to the directory or update your information, please use the survey form attached at the back of the directory.

This directory was initially developed by University of Minnesota Extension and the Minnesota Department of Natural Resources – Division of Forestry through a grant from the U.S. Forest Service State and Private Forestry's "Rural Development through Forestry" program. The current directory is being updated and maintained by the Minnesota DNR in partnership with University of Minnesota Extension and the Onanegozie RC&D.
