

"ATV"  
WILDFIRE PSA  
:30  
2004

**SFX: ATV approach, stop, idles**

**ANNCR:**

No doubt....ATVs are hot. Literally!

The exhaust systems on all terrain vehicles, motorcycles and tractors can be just that..... HOT!

They can easily start dry grass and other vegetation on fire.

So, when the weather's been dry, be sure to drive only on gravel paths or pavement.

Avoid stopping on dry brush or grass and park only in designated areas.

And carry a fire extinguisher.

Be cool....on your hot ride!

**TAG:**

Help Smokey Bear celebrate his 60<sup>th</sup> birthday...

Prevent wildfires!

Brought to you by the Great Lakes Forest Fire Compact.
