SFX: chain saw start-up

ANNCR:

Doing a little clean up around the yard?

Brushin' back the brush *can* protect your property from wildfire.

But, be careful you don't set a fire when you fire up that chain saw, lawn mower or tractor.

Make sure your gas powered equipment has spark arresters that are in good working order.

Avoid using them near dry grass or other combustibles.

And, keep a fire extinguisher handy.

These steps can keep you and our forests from going up in smoke.
