

"KEEPING YOUR GRASS GREEN"
WILDFIRE PSA
:30
2004

NEIGHBOR: Hey Bob, what's with all the sprinklers on your lawn?

BOB: Just a little preventive medicine, the Johnsons are burning their leaves again.

ANNCR:

Each year, thousands of wildfires are caused by careless burning.

They threaten homes just like yours.

So create a moisture barrier around your property. Pick up some extra garden hose and sprinklers.

They'll help keep your grass green and slow or stop a fire.

For more tips to protect your home from the spread of wildfire, visit your local DNR office or check out the Firewise.org website.

TAG:

Help Smokey Bear celebrate his 60th birthday.

Prevent Wildfires.

Brought to you by the Great Lakes Forest Fire Compact.
