THIS EMAIL IS NOT A PROJECT CLEARANCE

This information has recently been updated, please read the note below carefully.

This message simply reports the results of the cultural resources database search you requested. The database search produced results for only previously known archaeological sites and historic properties.

Archaeological sites and historic/architectural properties were identified in a search of the Minnesota Archaeological Inventory and Historic and Architectural Inventory for the search area requested. **A report containing the results of the searches is attached.**

The result of this database search provides a listing of recorded archaeological sites and historic/architectural properties that are included in the current MN SHPO databases. Because the majority of archaeological sites in the state and many historic/architectural properties have not been recorded, important sites or properties may exist within the search area and may be affected by development or construction projects within that area. Additional research, including field survey, may be necessary to adequately assess the area's potential to contain historic properties.

Properties that are listed in the National Register of Historic Places (NRHP) or have been determined eligible for listing in the NRHP are indicated on the reports you have received. The following codes on the reports you received are:

NR – National Register listed. The properties may be individually listed or may be within the boundaries of a National Register District.

CEF – Considered Eligible Findings are made when a federal agency has recommended that a property is eligible for listing in the National Register and MN SHPO has accepted the recommendation for the purposes of the Review and Compliance Process. There properties need to be further assessed before they are officially listed in the National Register.

SEF – Staff eligible Findings are those properties the MN SHPO staff considers eligible for listing in the National Register, in circumstances other than the Review and Compliance process.

DOE – Determination of Eligibility is made by the National Park Service and are those properties that are eligible for listing in the National Register, but have not been officially listed.

CNEF – Considered Not Eligible Findings are made during the course of a Review and Compliance process. For the purposes of the review a property is considered not eligible for listing in the National Register. These properties may need to be reassessed for eligibility under additional or alternate contexts.

Properties without **NR, CEF, SEF, DOE, or CNEF** designations in the reports you received may not have been evaluated and therefore no assumption to their eligibility can be made. Integrity and contexts change over time, therefore any eligibility determination made ten (10) or more years for the date of the current survey are considered out of date and the property will need to be reassessed.

If you require a comprehensive assessment of a project's potential to impact archaeological sites or historic/architectural properties, you may need to hire a qualified archaeologist and/or historian. If you need assistance with a project review, please contact Kelly Gragg-Johnson in Review and Compliance @ 651-201-3285 or by email at kelly.graggjohnson@state.mn.us.

The Minnesota SHPO Survey Manuals and Database Metadata can be found at <https://mn.gov/admin/shpo/identification-evaluation/>

MN SHPO research hours are 8:30 AM – 4:00 PM Tuesday-Friday. Please call ahead at 651-201-3295 to ensure staff is available to assist you, if necessary.

The Office is closed on Mondays.

Subject: Request for SHPO Database Search - MN Valley State Trail, Bloomington

Hello Jesse,

The Minnesota Department of Natural Resources is in the process of preparing an Environmental Assessment Worksheet (EAW) for proposed development of the Minnesota Valley State Trail, in Bloomington, from the Bloomington Ferry Bridge to the Minnesota Valley National Wildlife Refuge. Please accept this email and project description as a request for a database search for archaeological, historical and architectural districts or structures within the project area (please see attached maps and project area shapefile).

Project Description: The Minnesota Department of Natural Resources (MN DNR) proposes to develop a paved, multiuse trail as part of the Minnesota Valley State Trail, from the Bloomington Ferry Bridge to the Minnesota Valley National Wildlife Refuge Visitor Center, a distance of approximately 13.5 miles. The proposed state trail corridor will be located on land that is currently owned and managed by the City of Bloomington, the U.S. Fish and Wildlife Service (USFWS), Minnesota Department of Transportation (MNDOT) and three private landowners. The proposed corridor will be for a non-motorized, multi-use trail constructed to be 14 feet wide, consisting of a 10-foot bituminous (asphalt) surface with 2-foot aggregate (crushed stone) shoulders.

In 2016, the MNDNR Parks and Trails Cultural Resources Program completed a cultural resource field investigation of the project area. Project investigators recovered several fragments of prehistoric ceramics in one location and a number of historic period artifacts including a late 19th century tobacco pipe stem in another location, but because all of the recovered artifacts have been re-deposited from their original locations by flood waters, neither site is eligible for listing on the National Register of Historic Places. The field investigation report is in progress, but not yet completed.

Project location: City of Bloomington, Hennepin County, Minnesota
