## ABOUT THE PARK

Blue Mounds State Park protects sheer quartzite cliffs and over 1,500 acres of highly diverse prairie. Here you have the opportunity to see more rare prairie species than in any other park in southwestern Minnesota. Management programs restore native grasses and wildflowers, resulting in a panorama of prairie colors in late summer. Amid this rich landscape, you may also spot bison. The herd you see today began with the introduction of three bison from Nebraska in 1961. New calves are born each spring.

Experience a stunning prairie landscape.
