## TRAPPING HARVEST STATISTICS

Division of Fish and Wildlife 500 Lafayette Road, Box 20 Saint Paul, MN 55155-4020 (651) 259-5207

## 2013 TRAPPER HARVEST SURVEY

Margaret Dexter, Wildlife Research Unit

## **INTRODUCTION**

The Minnesota Department of Natural Resources (MNDNR) annually conducts a mail survey of licensed trappers. Annual harvest estimates from the survey data are used to help assess and set trapping regulations and season structure. Beginning in 2000, survey cards were sent to all trappers with a valid mailing address.

## **METHODS**

The sampling frame consisted of all individuals with active MNDNR trapping licenses (all types) listed in the Electronic License System (ELS) database in late February 2014. There were 10,224 active trapping licenses in the ELS database, which consisted of 7,815 Resident Regular Trappers, 581 Resident Junior Trappers, 1,310 Resident Senior Trappers, 517 "active" Lifetime Trappers, and 11 Nonresident (MN landowners) license holders. License type was reclassified as "adult" (regular, lifetime, and non-resident) or "youth" for analysis purposes.

The MNDNR Trapper Harvest Survey is a census but the response rate is <100% (mean = 75%, range: 58–84%). Thus, uncertainty in harvest estimates is strictly a function of non-response (missing data) rather than random sampling. However, if non-response (unit and item) is completely random then data from respondents can be treated as a random sample, which is how the Trapper Harvest Survey has been analyzed historically. The critical assumption is that non-response is completely random (e.g., if you repeated the survey, non-respondents would be a random subset of licensed trappers). For consistency with previous analyses, the response data was treated as a random sample.

A postcard survey (Figure 1) was sent to all trapping license holders with a valid mailing address at the close of the license year. Trappers that returned the survey questionnaire within three weeks were marked returned and eliminated from follow-up mailings. A single follow-up mailing was sent to non-respondents.

Returned questionnaires were checked for completeness, consistency, and biological practicability. Cards were marked with numeric county codes corresponding to the trapper's written information. Data from each usable card was converted to an electronic database. Duel key-entry and quality control checks were used to minimize transcription errors. Data was tabulated using Viking Data Entry VDE+ software and statistically analyzed using R programming language (ver. 2.9.2; R Development Core Team [RDCT] 2009) to summarize responses.

## RESULTS

There were 10,224 licensed trappers (99.2%) with deliverable addresses for the mail survey; 5,851 of these individuals returned useable questionnaires (response rate = 57.7%; Table 1, Figure 2). Seventy five percent of respondents (adults = 74%, youth = 81%) reported setting traps for at least one species (Table 1).

Historic trapper estimates are presented in Table 2 estimated number of trappers; Table 3 estimated take per successful trapper; and Table 4 estimated annual harvest, 2000-01 through 2013-2014.

This project was funded in part by the Wildlife Restoration Program (Pittman-Robertson).

Minnesota Department of Natural Resources Division of Fish and Wildlife Wildlife Research Unit 500 Lafayette Road, Box 20 St. Paul, MN 55155

RETURN SERVICE REQUESTED

#### Dear Trapper:

You are being asked as a trapping license buyer to assist us in evaluating the 2013-2014 trapping season (March 2013-February 2014). For Spring Beaver, please report only animals taken between March 2013 and April 2013. We need this information to estimate the season's harvest and to help set future furbearer trapping seasons. Similar to past years we are also asking for the average number of traps you set per day for each species. If a trap is set for multiple species, count the trap for both species when answering the question. For example, if you ran 20 mink/coon traps each day, enter 20 traps/day for both mink and coon.

#### YOUR RESPONSE IS NEEDED EVEN IF YOU DID NOT SET TRAPS THIS YEAR.

Please fill out the attached questionnaire and mail as soon as possible. A reminder will be sent to individuals not returning the questionnaire within three weeks. No envelope or stamp is necessary; just tear along the perforation and drop into a mailbox.

THANK YOU FOR YOUR COOPERATION

Ed Boggess, Director Division of Fish and Wildlife Department of Natural Resources

Minnesota Department of Natural Resources Division of Fish and Wildlife Wildlife Research Unit 500 Lafayette Road, Box 20 St. Paul, MN 55155

2013 Trapper Report

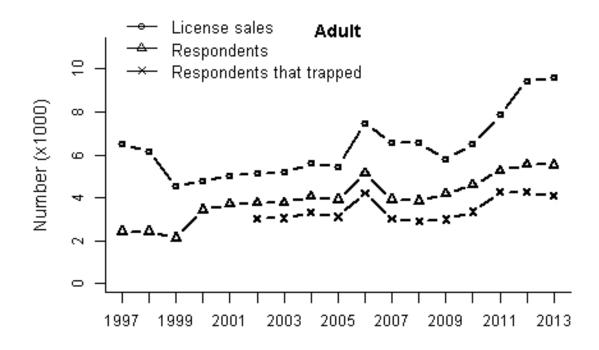

1. Did you set traps / snares in Minnesota during the 2013-2014 trapping season? □ No □ Yes (Please check one)

2. Indicate your harvest, the number of days you trapped for each species, the average number of traps you had set PER DAY for each species, and the county in which you trapped most for each species. Report only animals YOU personally trapped in Minnesota. Animals taken by hunting should NOT be reported here.

Species Trapped		Number YOU Trapped All Season	# Days Trapped All Season	Average # Traps/Snares Set Per Day	County You Trapped In Most
Muskrat	80				
Mink	32				
Gray Fox	96				
Striped skunk	34	Construction of the second			
Coyote (brush wolf)	97				
Beaver (Mar-April '13)	81				
Beaver (Oct '13-Feb '14)	82				
Pine marten	37				
Otter	38				
Fisher	36	Survey a proving			
Badger	35				
Long-tailed weasel	31				
Short-tailed weasel	30				
Opossum	10				
Bobcat	98				
Raccoon	94		en iper kein viele viele eine		
Red Fox	95

Table 4. Minnesota trapper license sales and estimated annual harvest, 2000-01 through 2013-2014<sup>a</sup>

<sup>a</sup> Includes data for all seasons from October through April of years indicated.

<sup>c</sup> Based upon trappers' responses to mail surveys.

<sup>e</sup> Registered harvest for bobcat includes animals taken by hunting. <sup>f</sup> Raccoon and red fox season continuous May 1994 thru March 15, 2006.

<sup>g</sup>Lynx (1984) and Eastern spotted skunk (1996) listed as Special Concern and threatened species (respectively) and are fully protected.

<sup>&</sup>lt;sup>b</sup> Separate licenses were issued for juveniles (13-17 years old) and adults (18 and older), beginning in 1982. Nonresident (MN Landowner) licenses started in 2004. Senior trapping licenses were first issued in 2007. Lifetime Licenses became available for free when renewing lifetime sports or small game licenses in 2007. As of April, 2013 - 10,224 trapping licenses were sold in 2013: 581 (5.7%) were junior licenses, 7,815 (76.4%) were Regular adult licenses, 1,310 (12.8%) were Senior licenses, 517 (5.1%) were Lifetime licenses, and 11 (<1%) were Nonresident (MN Landowner) licenses. Duplicate licenses excluded.

# MINNESOTA FUR BUYERS SURVEY FOR THE 2013-2014 HUNTING AND TRAPPING SEASON

Jason Abraham, Wildlife Season Setting/Furbearer Specialist Margaret Dexter, Wildlife Policy and Research Unit

### INTRODUCTION

Fur buyers are individuals licensed by the State of Minnesota to buy and sell raw fur. They are required to keep complete records of all transactions and activities related to buying, selling, and disposing of raw furs. Each year buyers are sent a questionnaire asking them to submit information regarding the "average" price they paid to trappers for various furbearers the previous season.

## **METHODS**

In August 2014, questionnaires were mailed to the 54 licensed fur buyers in Minnesota. The survey asked them to report the number and type of fur purchased from Minnesota trappers and hunters in 2013-14 and the "average price" paid to those hunters and trappers based on all fur purchased. A total of 34 usable surveys were received, for a return rate of 63 percent. Calculations of average pelt price for each species (Table 1) were weighted according to the number of pelts purchased by each buyer. Average pelt prices for the past 15 years are summarized in Table 2. Total estimated value of the furbearer harvest to trappers and hunters in 2013-14 was \$795,863.44, a 50 percent decrease from 2012-2013.

Table 1. Minnesota fur prices as reported by licensed fur dealers, 2013-14.

Species	Number Pelts	Minimum Price	Maximum Price	Weighted Mean
Muskrat	16,443	5.00	10.50	8.72
Mink Female	1,207	5.00	22.00	13.72
Mink male	1,329	10.00	24.00	18.11
Raccoon	19,818	9.00	28.00	16.58
Red Fox	860	15.00	50.00	30.90
Gray Fox	171	10.00	25.25	21.27
Coyote	3,487	0.00	40.00	21.30
Bobcat	48	65.00	133.00	88.63
River Otter	201	20.00	80.00	61.32
Beaver 10-12	2,153	8.00	20.00	16.52
Beaver 3-4	2,329	8.00	17.75	14.77
L.T. Weasel	0	0.00	0.00	0.00
S.T. Weasel	165	1.00	5.00	2.35
Striped Skunk	148	2.00	7.00	4.14
Badger	132	7.00	30.00	13.72
Opossum	217	1.00	2.00	1.52
Fisher Male	72	40.00	86.40	73.50
Fisher Female	66	50.00	85.00	67.73
Marten Male	50	50.00	80.00	74.10
Marten Female	32	50.00	80.00	70.94
Deer Hides	11,892	3.00	10.00	6.09
Bear Hides	19	25.00	60.00	42.63
