## Wildlife Manager Report

DPA 210 includes portions of eastern Polk and western Clearwater counties. Current modeling indicates that deer density has increased at a fast rate since 2016 and is at the goal established in 2021. The population seems to be at a density agreeable to a majority of hunters and nonhunters. A Two-deer limit seems to keep this population stable to slightly decreasing. Thus a Two-deer limit is in place for DPA 210 to keep the population at goal.
