Wildlife Manager Report

Deer permit area (DPA) 214 is very productive, containing little public land, and rarely experiences severe winters. The area covers northeast Todd County, and a small amount of southern Wadena and west-central Morrison Counties. The population is well above goal, and crop damage complaints have increased over time. This year's designation of a 3-deer limit plus early antlerless season is meant to provide opportunity to manage deer locally where needed, and move the deer population towards goal.
