Deer Harvest, Management Designation and Winter Severity Index from 2016 - 2021/22

Wildlife Manager Report

Deer Permit Area (DPA) 258 contains large blocks of public forestland and a significant amount of private land as well. The area contains good forested deer habitat consisting of mixed conifer and deciduous forest, a variety of wetlands, and some agricultural fields. Deer densities in this permit area are still variable, higher in the western portion and on private land. Deer numbers are likely lower than the new stabilize deer goal, especially on public forest lands, due to the recent more severe winter. The 2022 One deer either sex limit is meant to provide hunters and landowners flexibility to manage deer while allowing the deer population to recover in some areas.
