## Wildlife Manager Report

Deer Permit Area (DPA) 269 includes the southern half of Clay and the north quarter of Wilkin Counties. The land base is 70% agricultural, but a decent habitat mix of grasslands, wetlands and woodlots are present along the Agassiz Beach Ridge and the Red River and its tributaries. Severe winters in 2022 and 2023 reduced deer numbers below goal, but easy winters in 2024 and 2025 have the herd rebounding nicely. Buck harvest increased by 15% in 2024 while the antlerless harvest remained low due to restrictive antlerless tag allocations. There is a high population of deer around Buffalo River State Park, but in general deer numbers remain slightly below goal levels established in 2019. New this year - this DPA is now a CWD Surveillance Area with mandatory sampling of deer harvested during the opening weekend of the firearms deer season, and a deer feeding and attractant ban for Clay and Wilkin Counties; see the 2025 MN Hunting Regulations for more information. A Lottery designation with a small increase in antlerless tags to 275 will be used in 2025 to maximize harvest opportunities while allowing the herd to continue to grow towards goal levels.
