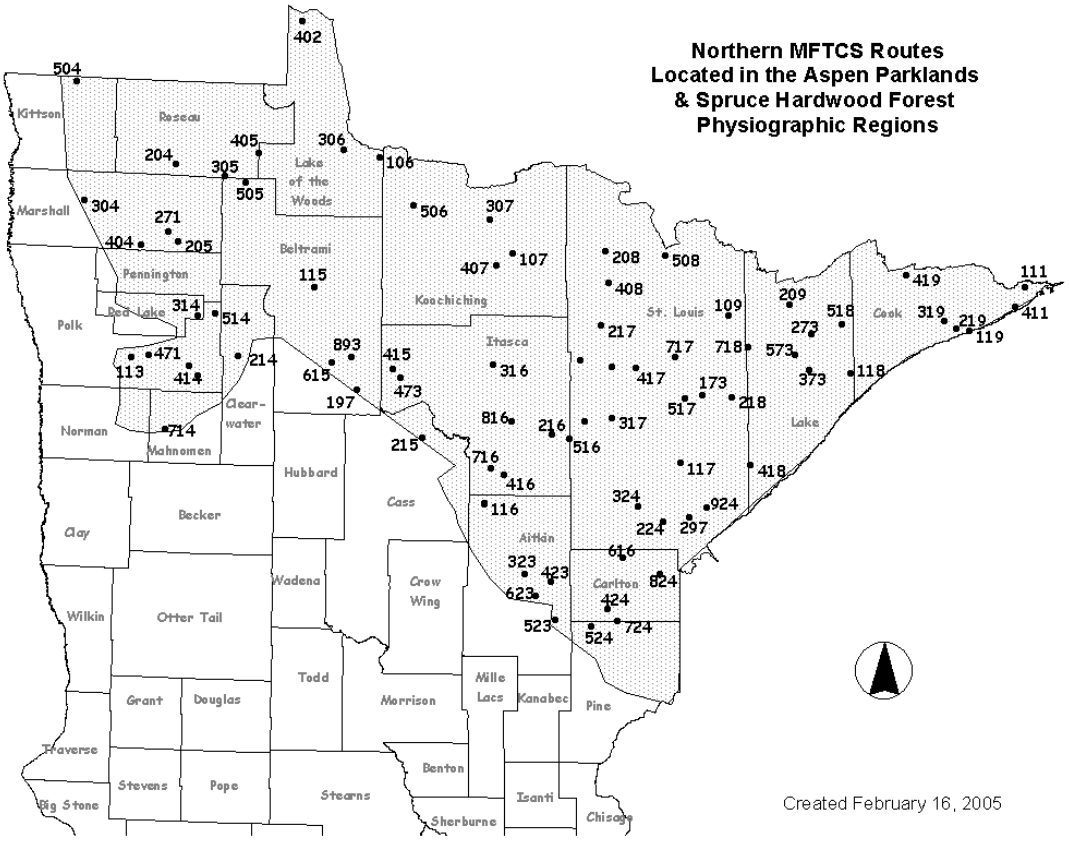
Minnesota Frog & Toad Calling Survey

Nongame Wildlife Program, Division of Ecological & Water Resources, MN Dept. of Natural Resources

NORTHERN ROUTES – Run dates

As of 2004, we have changed the run dates for routes within the Aspen Parkland and the Spruce-Hardwood Forest Physiographic Regions (see map below). After analyzing the dates that volunteers ran their routes over three years, we found that runs were consistently later for routes in this area, due to later spring temperatures than the rest of Minnesota, so we have officially changed the run dates throughout this area (see table below).



Run	New Dates as of 2004	Approx Water Temperature
1	April 25 - May 15	50ºF (10ºC)
2	May 30 - June 15	60ºF (16ºC)
3	July 5 - July 20	70ºF (21ºC)
