

## **Appropriation Permit Index Notes**

MN-DNR Water Appropriation permits are required for withdrawals greater than 10,000 gallons per day or one million gallons per year.

The permit index shows each installation of all active permits. Use, agricultural acreage, permitted pumping rate (in gallons per minute) and permitted volume (in millions of gallons per year) are repeated for each installation, but pertain to the permit as a whole.

Blank values mean no reported pumping or no report.

Public water supply wells/intake locations are only shown to the nearest section. Contact the Minnesota Department of Health, Well Management Unit, 651-201-4600 for more details on public supply well locations.
