Creation and Purpose of the Fund
The Legislature created the Natural Resources Fund (NR) in the state treasury in 1989 as a Special Revenue Fund for deposit of certain receipts from fees and services associated with natural resource management by the state. (M.S. 16A.53, subd. 2) Special revenue funds are dedicated to a variety of purposes specified in the legislation. In general, fees collected for certain activities are used by the Department of Natural Resources (DNR) to fund development, maintenance, operations, and enforcement of the laws with respect to those activities.

Natural Resources Fund within the DNR’s funding structure
For Fiscal Years 2008-2009, the Natural Resources Fund comprised 22.3 percent ($163.5 million) of the total DNR budgeted expenditures. For Fiscal Years 2010-2011, the Natural Resources Fund will comprise 19.2 percent ($160.0 million) of budgeted expenditures.
**Accounts in the Natural Resources Fund**

For Fiscal Year 2010, the Natural Resources Fund is made up of accounts dedicated for a specific purpose. These accounts include:

<table>
<thead>
<tr>
<th>Account Name</th>
<th>Sources and Uses of the Account Funding</th>
</tr>
</thead>
</table>
| All-Terrain Vehicle Account (ATV)     | - Revenues include fees from registration of all-terrain vehicles, unrefunded gasoline taxes, and ATV safety training fees.  
- Funds pay for acquisition, maintenance, and development of ATV trails and enforcement activities. (M.S. 84.927)                                                                 |
| Cross-Country Ski Account             | - Revenues include fees from cross-country ski passes.  
- Funds pay for grants-in-aid for cross-country ski trails sponsored by local units of government and special park districts. (M.S. 85.43)                                                                 |
| Forestry Management Investment Account| - Revenues include timber sales from consolidated conservation area lands and state forest lands.  
- Funds pay for reforestation and timber stand improvement including forest pest management, timber sales administration and costs, and state forest road maintenance. (M.S. 89.039, 89.035) |
| Invasive Species Account              | - Revenues include surcharges on watercraft licenses and civil penalties for violations.  
- Funds pay for management of invasive species programs including control, public awareness, law enforcement, assessment, monitoring, management planning, and research. (M.S. 84D.15) |
| Land Acquisition Account              | - Revenues include easements on DNR lands, sale of land, sale of standing timber, leases on wild rice farming and interest.  
- Account is used for the acquisition of natural resource lands within the outdoor recreation system. (M.S. 94.165)                                                                 |
| Lottery in Lieu (Local Trails Grants Account) | - Revenues include lottery payments in lieu of sales tax on lottery tickets.  
- Funds are used for local trail grants. (M.S. 297A.65, 297A.94 (e)(4))                                                                                                                                         |
| Lottery in Lieu (Metro Parks and Trails Account) | - Revenues include lottery payments in lieu of sales tax on lottery tickets.  
- Funds are used for metropolitan park and trail grants. (M.S. 297A.65, 297A.94(e)(3))                                                                                                                                           |
| Minerals Management Account           | - Revenues include mineral lease income related to management of the state’s mineral assets.  
- Funds are spent for mineral resource management and projects to enhance future mineral income and promote new mineral resource opportunities. (M.S. 93.2236, 93.22)                       |
| Mining Administration Account         | - Revenues consist of mining administrative fees charged to owners, operators, or managers of mines.  
- Funds pay for costs of providing and monitoring permits to mine. (M.S. 93.481, subd 7)                                                                                                                                 |
| Natural Resources Misc. Statutory Account (Dedicated Receipts Account) | - Account includes various dedicated revenues within the Natural Resource Fund for which the appropriations are statutory – burning permits account, forest bough account, forest resource assessment products and services account, and land management account.  
- Sources and uses of the funds are specified in the individual statutes for the component accounts. (M.S. 88.17, 88.6435, 89.421, 92.685, 103G.301) |
| Nongame Wildlife Management Account   | - Revenues are from the check-off on income tax and property tax refund claim forms.  
- Funds pay for non-game wildlife programs. (M. S. 290.431)                                                                                                                                                               |

| Snowmobile Trails and Enforcement    | • Revenues include fees for registration of snowmobiles, unfunded gasoline tax, and training fees.                                                                                                                                       |
| Account                              | • Funds pay for snowmobile programs and acquisition, maintenance and development of trails, training, and enforcement. (M. S. 84.83)                                                                                                |
| State Land and Water Conservation    | • Federal grant reimbursement funds that are received under the Land and Water Conservation Fund Act.                                                                                                                                  |
| (LAWCON) Account                     | • Half is distributed for projects of local units of government. The state share is for land acquisition and development of the state outdoor recreation system and for administrative expenses necessary to maintain the state's eligibility for the program. (M. S. 116P.14) |
| State Parks Account                  | • Revenues include fees for state park permits.                                                                                                                                                                                          |
|                                      | • Funds pay for operation and maintenance of the state park system. (M. S. 85.055)                                                                                                                                                      |
| Lottery in Lieu (State Parks and     | • Revenues include lottery payments in lieu of sales tax on lottery tickets.                                                                                                                                                               |
| Trails Account)                      | • Funds are used for state parks and trails. (M. S. 297A.65, §297A.94 (e) (2))                                                                                                                                                        |
| Water Recreation Account             | • Revenues include fees for titling and licensing watercraft, mooring, and sale of marine gas at state-operated small craft harbors and mooring facilities, unfunded gasoline tax attributable to boating, fees for permits to control or harvest aquatic plants. |
|                                      | • Funds pay for water recreation programs such as acquisition, development and maintenance of public water access and boating facilities on public waters, lake and river improvements; maintenance, operation, replacement, and expansion of small craft harbors and mooring facilities, water safety programs, management of aquatic invasive species and aquatic plants. (M.S. 86B.706) |
| Lottery in Lieu (Zoos Account)       | • Revenues include lottery payments in lieu of sales tax on lottery tickets.                                                                                                                                                               |
|                                      | • Funds are used by the Minnesota Zoological Garden, Como Zoo and Conservatory, and Duluth Zoo. (M.S. 297A.65, 297A.94 (e) (5))                                                                                                             |
Cross functional programs and activities
Some DNR activities or programs are supported by multiple Natural Resource Funds. Some of these activities include:

**Land Records Management System**
The DNR manages 5.6 million acres of state-owned land and 12 million acres of state mineral rights. Effective management of the state’s land and mineral resources requires that DNR staff have access to accurate land records and related financial records for specific state-owned parcels of land, and the ability to integrate this information with public records of local government.

In FY2010, Five “Proof of Concept” work flows (PILT, Monitoring Conservation Easements, Acquisition Process, WIRE/MAPS Interface, and Earthen Material leases) were delivered and reviewed. DNR staff’s expertise was compiled into detailed design artifacts for the development of the 32 distinct system business processes. The project created Crystal Reports on the DNR Intranet for commonly requested current land records information, scanned and indexed Utility Licenses and Easements, and finished integrating county parcel data from nearly half of Minnesota’s counties.

Legislative appropriations to fund the Land Records Management System are provided from the Game and Fish Fund and the Forest Management Investment, Snowmobile, and Water Recreation accounts in the Natural Resources Fund. FY2010 expenditures for the Land Records Management System were $880,337 from the Natural Resources Fund.

**Electronic Licensing System (ELS)**
The DNR Division of Fish & Wildlife maintains the Electronic Licensing System. Issuing fees charged on the sales of licenses, permits, and registrations are used to support licensing activities and maintain the system.

The money collected is deposited in the account within the Natural Resources Fund that issues the license, permit, or registration. The accounts using ELS and collecting issuing fees include: Water Recreation, Snowmobile, All-Terrain Vehicle (ATV), Off-Highway Motorcycle (OHM), Off-Road Vehicle (ORV), State Parks, Cross Country Ski, and Natural Resource Misc Statutory. The total ELS expenditures for FY2010 from the Natural Resources Fund account were $1.36 million.

**Conservation Corps Minnesota**
The DNR has worked with Conservation Corps Minnesota (formerly Minnesota Conservation Corps) for 25 years to preserve and improve the natural resources of the State of Minnesota. This organization, which began in the 1930s, restores natural resources, conserves energy, responds to emergencies, and offers programs for youth and young adults.

In FY2010, Conservation Corps Minnesota received funds from various NR Fund accounts pursuant to Laws of 09, Chapter 37, Article 1, Section 7 to support the following DNR activities:

- Develop and maintain public access and boating facilities on public waters; lake and river improvements; develop water access sites within state parks; watercraft safety; and exotic species inspections and control (Water Recreation);
- Construct, maintain, and groom state trails (Snowmobile, All-Terrain Vehicle, Off-Highway Motorcycle, and Off-Road Vehicle);
- Accomplish objectives of nongame wildlife programs (Nongame Wildlife Management);
- Accomplish objectives of forest management programs (Forest Management Investment)
Revenues that Support Multiple Funds

Unrefunded Gasoline Tax Revenue

The Minnesota Department of Transportation transfers to the DNR, twice annually, the estimated portion of the unrefunded gasoline tax that was used by boaters, snowmobiles, and all-terrain vehicles. The amounts are transferred to several accounts in the Natural Resources Fund based on a formula written in statute (296A.18). As the table shows, approximately 3.1 percent of unrefunded gasoline tax revenues – the portion attributed to use by boaters, snowmobile, and ATVs – are transferred into natural resources accounts and are appropriated annually for the purposes described in law.

</tr>
</tbody>
</table>

Police State Aid Revenue

The DNR receives police state aid to apply to the employer’s contribution to law enforcement (conservation officers) pensions. Tax receipts from a surcharge on auto insurance gross premiums determine the amount of the aid.

In FY2010, the accounts in the Natural Resource Fund that received an apportionment (based on the amount of conservation officer salaries paid from each account) were Water Recreation, Snowmobile, All-Terrain Vehicle, Off-Highway Motorcycle, and Off-Road Vehicle.

Interest Earnings

Minnesota statutes allow interest earnings to be earned on balances in several DNR funds and accounts. Interest is credited to the fund or account and available for appropriation for the purpose for which it was received. The NR fund earns interest on donations, gifts, snowmobile receipts, and receipts deposited in the minerals management account, mining administration account, and forest management investment account. (M.S. 16A.72)

**6**
Revenues and Actual Expenditures for Fiscal Year 2010

The sources of revenues in the Natural Resources Fund principally include receipts from operations and transfers in to the accounts from other sources.

In FY2010, DNR collected $83,692,078 in total receipts and transfers in. The five largest sources of operating revenues are licenses and registrations, state park fees, mining fees, and timber sales. Unrefunded gasoline tax revenues attributable to certain types of vehicles used in recreation activities comprise the largest amount of transfers in. For details see individual funds.

FY2010 Receipts and Transfers In

- License & Registration: 35%
- Lottery in-lieu: 14%
- State Park Fees: 14%
- Mining Fees: 4%
- Timber: 6%
- Permits: 3%
- NR Dedicated Receipts: 2%
- License Issuing Fee: 1%
- Donations from Income Tax Return: 1%
- NR Dedicated Receipts: 1%
- Donations from Income Tax Return: 1%
In FY2010, DNR spent $82,607,904 in total expenditures and transfers out. The Division of Parks and Trails spent the majority of these funds.

Creation and Purpose of the Account
Three types of recreational vehicles are classified under statutes as Off-Highway Vehicles. Each has its own separate account in the Natural Resources Fund. They have common requirements for permitting and safe operations under M.S. 84.773 to 84.781. In addition, an Off-Highway Vehicle Damage (OHVD) Account was created to help pay for damage from illegal operation of off-highway vehicles.

1. All-Terrain Vehicle Account
The ATV Account was established in 1984. Sources of funding for this account include fees from the registration of all-terrain vehicles, the unrefunded gasoline tax attributable to ATV use, and the net proceeds from the sale of ATVs forfeited for certain violations of statutes under M.S.84.927 and M.S. 169A.63. Funds in the ATV Account may be used, within guidelines of the Statewide Comprehensive Outdoor Recreation Plan, only for:

- Acquisition, maintenance, and development of trails and use areas;
- Administration, enforcement, and implementation of applicable statutes;
- Grant-in-aid programs to counties and municipalities to construct and maintain ATV trails and use areas; see Grants Outcomes website;
- Education and training program;
- Grant-in-aid to local safety programs; see Grants Outcomes website;
- Enforcement and public education grants to local law enforcement agencies; and
- Maintenance of certain forest roads and county forest roads that are part of a designated trail system within state forest boundaries.
FY2010 Financial Summary

Receipts
63 percent of the revenues in the ATV account are from registrations. Transfers in to the account, mostly unfunded gasoline tax revenues for gas sales attributable to ATV usage, represent about 31 percent of the revenues this year. New revenue for non-resident ATV trail passes was effective this year taking in $12,878. Interest earnings have declined due to the economy.

Expenditures
The Division of Parks and Trails, including the grants in aid projects, made up approximately 52 percent of the expenditures. The Enforcement Division expenditures, including enforcement grants, comprised approximately 40 percent of the total.

Fund Balance
The fund balance increased by approximately 42 percent this year. Revenues remain constant and expenditures increased slightly from FY09 to FY10. The unfunded gasoline tax amount has been increasing for this fund and is expected to increase through FY2013.

FY2010 Activities and Accomplishments
Parks & Trails developed, managed, and maintained ATV recreational trails that are open to the public. Approximately 69 miles of winter use ATV trails and 1091 motorized miles of ATV/OHM trails in state forests were open for public use. Parks & Trails administered 41 grants to counties, cities, and towns to encourage maintenance, development, and acquisition on 1,319 miles of public, locally controlled ATV trails.

Enforcement provided law enforcement activities and safety and training services for ATVs in communities around the state. Approximately 19,000 hours of enforcement activities were provided including information, education and training, and law enforcement. Grants were also made to local law enforcement to enforce state laws and rules for ATV use. The Trail Ambassador grant program provided 5,134 hours of trail monitoring while observing over 5,000 miles of trail.

The Electronic Licensing System (ELS), operated by the Division of Fish & Wildlife, collected fees for ATV registration and activities in state recreation areas and trails. Expenditures from the ATV Account paid for development and operation of the licensing system attributable to ATV activities.

Conservation Corps Minnesota received funds pursuant to Laws of 09, Chapter 37, Article 1, Section 7 from various Natural Resources Fund accounts to support the Department of Natural Resources (DNR) program activities, including constructing, maintaining, and signing state trails including ATV trails.
Budget Trends FY2003 to FY2013
The fund balance has been declining since FY2003, but increased in FY2010 due to increases in unrefunded gasoline tax. Both revenues and expenditures have been increasing since FY2002 and that trend is expected to continue in through FY2013.
2. **Off-Highway Motorcycle Account**

The OHM Account was established in 1993. (M.S. 84.794) The sources of funding for the account include registration fees for OHMs and the unrefunded gasoline taxes attributable to OHM use. Money in the account may only be spent for:

- Administration, enforcement, and implementation of OHM sections of statutes (M.S. 84.787 to 84.795);
- Acquisition, maintenance, and development of OHM trails and use areas; and
- Grants-in-aid to counties and municipalities to construct and maintain OHM trails and use areas. Grants must be guided by the Statewide Comprehensive Outdoor Recreation Plan.

**FY2010 Financial Summary**

**Receipts**

Unrefunded gasoline tax revenues from the use of OHMs accounted for 65 percent of all FY2010 receipts (including revenues and transfers in). Registrations and the license issuing fees made up 34 percent of the total receipts.

**Expenditures**

Parks & Trails, including grants in aid projects, made up 66 percent of the FY2010 expenditures. The Enforcement Division’s expenditures, including grants, made up 32 percent of the total.

**Fund Balance**

The fund balance increased by approximately 10 percent in FY2010. The unrefunded gasoline tax has been increasing for this fund and is expected to increase through FY2013.

**FY2010 Activities and Accomplishments**

Parks & Trails developed, managed, and maintained OHM trails that were open to the public. More than 858 motorized miles of ATV/OHM trails and 143 single-track OHM miles were open for public use. Parks & Trails administered grants to counties to encourage maintenance, development, and acquisition of public, locally controlled OHM trails and areas.

Enforcement provided law enforcement activities and safety and training services for OHMs at state parks, forests, and recreational trails. Approximately 1,300 hours of enforcement activities were provided including information, education and training, and law enforcement. Grants were also made to local law enforcement to enforce state laws and rules for OHM use.

**Notes**

1 Other receipts: license credit card service charge, citations, credit agreement rebate, agency direct costs and cash overage/shortage
**Budget Trends FY2003 to FY2013**

The fund balance has been declining since FY2004 and except for FY2010 which increased because of unrefunded gasoline tax, it is expected to continue to decline through FY 2013.

![Graph showing Off Highway Motorcycle Account trends from FY2003 to FY2013](image-url)
3. Off-Road Vehicle Account
The ORV Account was established in 1993. Fees from the registration of off-road vehicles and revenues from unrefunded gasoline tax attributable to off-road vehicle use are the principal revenue sources. Money in the ORV Account may only be spent for:

- Administration, enforcement, and implementation of M.S. 84.773 to 84.805;
- Acquisition, maintenance, and development of off-road vehicle trails and use areas;
- Grant-in-aid programs to counties and municipalities to construct and maintain off-road vehicle trails and use areas;
- Grants-in-aid to local safety programs; and
- Enforcement and public education grants to local law enforcement agencies.

FY2010 Financial Summary

Receipts
Revenues from unrefunded gasoline taxes attributable to ORV vehicle use made up 96 percent of the available funds. ORV registrations accounted for three percent of revenues.

Expenditures
Parks and Trails expenditures made up 80 percent of total expenditures from the ORV account. Enforcement Division expenditures represented approximately 18 percent of the total.

Fund Balance
The fund balance increased by approximately 25 percent this year. Expenditures have been decreasing slightly and the unrefunded gasoline tax has been increasing for this fund and is expected to increase through FY2013.

FY2010 Activities and Accomplishments
Parks and Trails developed, managed, and maintained ORV recreational trails that were open to the public. In FY2010, 27 motorized miles of ORV trails in state forests were open for public use. Parks and Trails administered grants to counties to encourage maintenance, development, and acquisition of public, locally controlled ORV trails and areas.

Enforcement provided law enforcement activities and safety and training services for ORVs at state parks, forests, and recreational trails. Approximately 1,100 hours of enforcement activities were provided including information, education and training, and law enforcement. Grants were also made to local law enforcement to enforce state laws and rules for ORV use.

The Electronic Licensing System (ELS) operated from the Division of Fish & Wildlife collected fees for ORV related activities in state parks, trails, and use areas. The FY2010 expenditures from the ORV account paid for operation of the licensing system attributable to these activities.
Budget Trends FY2003 to FY2013
The fund balance has been declining since FY2003 and is projected to continue that trend through FY2013 with the exception of FY2010. FY2010 fund balance increased due to an increase in unrefunded gasoline tax and a reduction in expenditures.
Off-Highway Vehicle Damage Account
The OHVD account was created in 2003. Money was appropriated to the DNR for the repair and restoration of property damaged by operation of off-highway vehicles in unauthorized or unpermitted areas. Funds are available to repair damage to private or public lands caused by off-highway vehicle operation in unauthorized or unpermitted areas. Cities and towns are eligible to receive the funds. Claims may come from ATV, OHM, or ORV operation.

The legislature appropriated $500,000 in FY2004, and that amount is available until spent. The budgeted amount for FY2010 was $392,547. There were no claims in FY2010.

Creation and Purpose of the Account
The cross-country ski program was established in 1983 and moved to the Natural Resources Fund in 2004. Receipts from cross-country ski passes are deposited into this account and used for maintenance and grooming of cross country ski trails.

Sources and Uses of the Funds
M.S. 85.43 provides that money deposited in the Cross-Country Ski Account is to be used for grants-in-aid for cross-country ski trails sponsored by local units of government and special park districts.

The Minnesota Department of Natural Resources (DNR) administers 1,400 miles of state-operated and grant-in-aid cross-country ski trails statewide. By purchasing a ski pass, cross-country skiers support the maintenance and grooming of these cross-country ski trails. Most grant-in-aid cross-country ski trails are maintained by local ski club volunteers.
FY2010 Financial Summary

Receipts
Revenue was down from last fiscal year by approximately three percent. This activity is dependent upon snowfall.

Expenditures
Grants-in-aid are approximately 91 percent of the expenditures in this account. Issuance fees retained by the DNR License Center/ Electronic Licensing System (ELS) or merchants based on where ski permits are purchased make up nine percent of expenditures. This money is used for maintenance of the ELS.

Fund Balance
The fund balance decreased by approximately one percent this year. Revenues were slightly lower than last year and expenditures exceeded revenue. Increase in expenditures was due largely to offering one time capital improvement grants resulting in an additional $25,000 out of the account.

FY2010 Activities and Accomplishments
Grants-in-aid recipients for this year included 25 counties, 12 cities and one township.

Budget Trends FY2005 to FY2013
Revenues & expenditures vary considerably from year to year. Revenues are tied to the amount of snow received in a year.

Creation and Purpose of the Account
The Forestry Management Investment Account (FMIA) was established in 2004 in M.S. 89.039 to create a direct connection between state timber program revenues and expenditures. Prior to the establishment of FMIA, state timber receipts were deposited in the state general fund and the Division of Forestry’s timber program was supported entirely from the general fund.

Sources and Uses of the Funds
The primary source of FMIA funds are revenues earned from state land timber management and related activities. State acres subject to forest management activities total 5.4 million acres including approximately 2.8 million acres of commercial timberland. Approximately 800,000 cords of roundwood are offered for sale annually with harvests focused on maintaining and improving forest health and productivity. On average, 40,000 acres of commercial timberland are harvested each year, supplying the state’s forest industry with quality wood fiber used for the manufacture of paper, lumber, structural panels, and specialty products. Timber sales and related activities generate direct revenues for the Division of Forestry, Division of Fish & Wildlife, the School/University Trust, and northern Minnesota counties.

FMIA dollars can be spent, subject to appropriation by the Legislature, in accordance with the forest management policy and plan, for these purposes:

- State timber sales planning, layout, and administration, contract marking of commercial thinning sales, cultural resource reviews, and other timber sales costs;
- State land reforestation and timber stand improvement, including forest pest management; and
- State forest road maintenance costs.
FY2010 Financial Summary

Receipts
The Forest Management Investment Account (FMIA) received $4.4 million in revenue attributable to forestry products on acquired state land. Other timber revenue was deposited into the school/university trust accounts, game & fish fund, general fund, and distributed to Minnesota counties, based on the type of land the timber was harvested from.

Forest management activities supporting the generation of this timber sales revenue include issuing permits to harvest timber, reforestation, and site preparation for regeneration, seedling protection, timber stand improvement, native plant community classifications, and state forest road maintenance.

State timber sales generated gross revenues of $18.9 million including $8.6 million from School and University Trust lands. Some $4.4 million timber revenue originating from acquired state forestry lands was deposited into the FMIA. An additional $2.2 million, 50% of the revenue generated from consolidated conservation (con-con) tax forfeited lands, was transferred to the FMIA. The other 50% of timber revenue generated from con-con lands was transferred to the counties. As authorized under M.S. 16A.125, subd. 5(d)(1), $4.9 million in forest management and related expenditures directly attributable to School and University Trust lands management were transferred into the FMIA.

Expenditures
The FMIA incurs costs associated with forest management and related activities on all land types, then collects reimbursement from other accounts based on costs certified through the “Transfer Certification Report” required by M.S. 16A.125.

FMIA expenditures decreased from $16 million in 2009 to $11.8 million in 2010 as a result of the recession driven downturn in Minnesota’s forest-based economy and strategic adjustments made to compensate for dramatically reduced revenues.

Fund Balance
The FY2010, ending fund balance was $3.6 million, an increase approximately 2.2 million or 157 percent over last year. Timber sales increased slightly from last year. This account is dependent on the timber market. Expenditures were reduced to accommodate revenue changes.

FY2010 Activities and Accomplishments
In FY2010, the Division of Forestry offered 928,300 cord equivalents for sale with 769,350 cords sold and 826,300 cords harvested including biomass. All harvested lands were reforested including about 5,800 acres planted and 7,300 acres direct seeded. Some 1,240 miles (62 percent) of the state’s 2,000 miles of
system roads were graded at least once with total graded miles equal to 6,970. Forest inventory was updated on approximately 150,000 acres. In addition, about 70,000 acres were surveyed for native plant community (NPC) designation.

**Budget Trends FY2005 to FY2013**
The FMIA was created at a time when state timber revenues were spiking upward as a result of the U.S. housing construction boom and general economic prosperity. The account balance peaked near the end of FY2007 at approximately $9 million followed by declines in FY2008 and FY2009 as forest products manufacturing output and stumpage values dropped along with housing and financial markets. Planned expenditures continue to be adjusted to accommodate flat revenue expectations through FY2013. Planned FY2011 expenditures are $11.9 and planned FY2012-13 expenditures are $11.5 million. As of December 31, 2010, the Division of Forestry had 2.2 million cords under permit with a book value of $45.1 million, an average of $20.96 per cord. Based on the volume and value of wood under permit, annual gross timber revenues are expected to be flat at approximately $18 million through 2013. The FMIA balance is expected to decline slightly each year through 2013. Both timber revenues and the FMIA balance are expected to start increasing in 2014 as the average value of wood harvested starts to increase.

Invasive Species Account
Natural Resources Fund
Fiscal Year 2010 Annual Report

Creation and Purpose of the Account
The 1991 Legislature directed the Department of Natural Resources (DNR) to establish the Invasive Species Program and to implement actions to prevent the spread and manage invasive species of aquatic plants and wild animals. Invasive (non-native) species threaten the state's natural resources and the local economies that depend on natural resources. The Invasive Species Account was established in 2007 to help fund the program (M.S. 84D.15). The first funding in the account was received in FY2008.

Sources and Uses of the Funds
Money received from a $5 surcharge on watercraft licenses under M.S. 86B.415, subd. 7, and civil penalties for violations of the law related to prohibited invasive species under M.S. 84D.13 are deposited into the account. Receipts from an annual $2 surcharge on nonresident fishing licenses under M.S. 97A.475, subd. 7, are transferred each year from the Game & Fish Fund to the Invasive Species Account. In addition to the funds from the Invasive Species Account, in FY2010 the Invasive Species Program also received funding from the state general fund, the Environment and Natural Resources Trust Fund, and local contributions.

Funds from the Invasive Species Account are used for management of invasive species and implementation of Chapter 84D as it pertains to invasive species. Major activities include control of invasive species, watercraft inspection, public awareness, law enforcement, assessment and monitoring, management planning, and research.

FY2010 Financial Summary

Receipts
The $5 watercraft surcharge was the largest source of revenue (54 percent) in FY2010. The $2 surcharge on nonresident fishing licenses generated 18 percent of revenues. Revenue received from surcharges on watercraft licenses deposited into the Game and Fish Fund and transferred to the Invasive Species Account are now a major source of income for this account.
Expenditures
Major expenditures were for watercraft inspections and enforcement (42 percent), management/control activities for specific invasive species (34 percent), and state/regional coordination (11 percent). Administration and education/public awareness comprised the remainder (13 percent) of FY2010 expenditures.

Fund Balance
The fund balance increased by approximately 111 percent in FY10. $725,000 was transferred from the Water Recreation Account to the Invasive Species account per M.S. 84D.15

FY2010 Activities and Accomplishments
In FY2010, the main program goals were:
- Prevent introductions of new invasive species,
- Prevent the spread of invasive species, and
- Reduce the impacts caused by invasive species.

Of the total program expenditures in FY2010, approximately 43 percent were from the Invasive Species Account. Staff paid with these funds conducted field surveys and monitoring, provided technical assistance to lake associations and citizens, enhanced public awareness to prevent the spread of invasive species, implemented control, and managed contracts for control that were funded with other sources of funds.

Control efforts for purple loosestrife included monitoring and oversight of chemical control at 74 sites, and release and/or monitoring at 130 sites where beetles are being used as biocontrol agents. At 24 lakes, pre- and post-treatment surveys for curly leaf pondweed were conducted and contracts for control (funded with other dollars) were administered. Pre-treatment surveys for Eurasian water milfoil were conducted at 25 lakes, and contracts for control (funded with other dollars) were administered. At Leech Lake and Mille Lacs Lake, staff surveyed and chemically treated selected harbors infested with Eurasian water milfoil to prevent/slow its spread. Zebra mussel infestations were monitored statewide and control strategies implemented where feasible. In addition, more than 66,000 watercraft were inspected statewide to prevent the spread of invasive species.

Budget Trends FY2008 to FY2013
Expenditures have mirrored the increase in revenue through FY2010. Fund balances increased in FY10 & FY11 due to the transfer from the Water Recreation Account.

The fund balance is projected to decrease in FY2012 and FY2013. In 2012-13 biennial budget the governor recommends increasing watercraft license and non-resident fishing license surcharges to generate more funding for aquatic invasive species management.

Land Acquisition Account
Natural Resources Fund
Fiscal Year 2010 Annual Report

Creation and Purpose of the Account
The Department of Natural Resources (DNR) administers 5.5 million acres of land within state forests, state parks, wildlife management areas, scientific and natural areas, aquatic management areas, and other recreation and access sites. The Minnesota Legislature established the Land Acquisition Account in 1984 under Minnesota Statutes 94.16 and 94.165 for the acquisition of natural resource lands or interests in land within the Outdoor Recreation System established in Minnesota Statutes, Chapter 86A.

Sources and Uses of the Funds
Receipts from the sale of acquired state natural resource land administered by the DNR are credited to the Land Acquisition Account (the “Account”). These credits provide funding to acquire additional state natural resource land in the Outdoor Recreation System and to cover the costs of sale of surplus state land. The Account helps the DNR reach the goals of: (1) consolidating state forest land into large contiguous blocks to increase forest management efficiencies and protect critical forest habitat; (2) acquiring privately owned “in-holdings” within state parks; (3) acquiring recreation access; and (4) acquiring lands with significant natural resource characteristics.

FY2010 Financial Summary
Receipts
In FY10, the DNR credited $27,638 to the Land Acquisition Account that it received from the sale of standing timber. The DNR sold two acquired parcels and credited $12,365 in sale proceeds to the Land Acquisition Account. An internal audit revealed two discrepancies totaling $76,503 in FY10 sales receipts credited to the Land Acquisition Account: $47,503 in proceeds were from the sale of school trust fund land and $29,000 was refunded to the buyer due to the State’s inability to consummate the sale. The adjustments of $76,503 were made in FY11 and will be reflected on the FY11 Land Acquisition Account Report.

The DNR sold an additional four acquired parcels in FY10. However, the net sale proceeds were credited to the general fund as mandated by the Legislature. (see Laws of Minnesota 2005, Chapter 156, Art. 2, Sec. 45, as amended by Laws of Minnesota 2007, Chapter 148, Art. 2, Sec. 73, and as amended by Laws of Minnesota 2009, Chapter 37, Art. 1, Sec. 59). Without the legislative mandate, the
sale of these four acquired parcels would have resulted in a $192,000 credit to the Land Acquisition Account in FY10.

The land sale service charges credited to the Land Acquisition Account reflect the reimbursement of funds utilized from the Land Acquisition Account to pay for appraisals and professional services. The DNR reimbursed the Land Acquisition Account from the gross proceeds from all sales when the DNR paid for these services from the Land Acquisition Account during the sale process.

**Expenditures**
Fish & Wildlife spent approximately 70 percent of the funds in FY10, Forestry spent 22 percent and Parks and Trails spent 8 percent. Divisions utilize the Land Acquisition Account to pay for the sale costs (e.g. appraisals, legal notifications, and professional / technical services). There is a direct correlation to the percentage of the account spent by a particular Division to the number of parcels offered for sale as the majority of the sale parcels offered in FY10 were administered by Fish & Wildlife and Forestry.

**Fund Balance**
The account balance increased approximately 19 percent in FY2010. Nevertheless, the account is dependent upon land sales. Land sales receipts are down due to a depressed real estate market. Additionally, the legislative mandate directing state agencies to sell $6.44 million of state owned lands by June 30, 2011 has redirected sale proceeds from the Land Acquisition Account to the general fund. Since 2005, the DNR has contributed $2.46 million in net sale proceeds to the general fund instead of the Land Acquisition Account.

**FY2010 Activities and Accomplishments**
In FY10, the account supported land sale preparatory costs and land acquisition professional services costs. The DNR utilized $96,251 of the $130,840 in expenditures to offer parcels for sale and to complete land acquisitions. The remaining $34,589 is an ongoing encumbrance for site cleanup within the Bayport WMA complex.

**Budget Trends FY2003 to FY2013**
Land Acquisition Account revenues vary from year to year. Due to the downturn in the real estate market since 2008, and until the budget balancing law requirement is met, the DNR has had very few opportunities to sell surplus state land that would provide receipts for the Land Acquisition Account.

Legislation passed in 2005 and re-passed in 2007 and 2009 shifted revenues from land sales on acquired lands from this fund to the general fund to help balance the state budget (Laws of Minnesota 2009, Chapter 37, Art. 2, Sec. 45). As stated previously, since 2005 the DNR has contributed $2.46 million in net sale proceeds to the general fund rather than the Land Acquisition Account. All state agencies have raised $4.3 million through the sale of state-owned land, leaving $2.1 million to raise through sales by June 30, 2011.

A 2009 law prohibits the use of the proceeds from the sale of land within the Outdoor Recreation System as of May 8, 2009 to meet the 2005 budget balancing law. Thus, proceeds from the sale of acquired lands within the outdoor recreation system will now be deposited into the Land Acquisition Account. With the continued
soft real estate market, expectations for the Land Acquisition Account revenues remain low. The smaller account balance is expected to result in only a few small land acquisitions in the near future.

TTY: (800) 657-3929
Creation and Purpose of the Account
Legislation enacted in 2000 provided that sales of state lottery tickets would be exempt from sales tax. The legislation also provided that the lottery would make payments to the state treasury in lieu of the sales tax equal in amount to what the sales tax would have been on the gross proceeds of lottery ticket sales. These revenues are credited to various funds and accounts, among them the accounts listed above. These are the four “lottery in lieu” (LIL) accounts in M.S. 297A.65.

Sources and Uses of the Funds
Under M.S. 297A.94 (e), 50 percent of the “lottery in lieu” receipts are credited to these four accounts. State Parks & Trails Account receives 22.5 percent; Metro Parks & Trails Account receives 22.5 percent; Local Trails Grants Account receives 3 percent; and the Zoos Account receives 2 percent. The funds must be used for specified purposes:

- State Parks and Trails Account (LIL) – money is spent only for state parks and trails
- Metropolitan Parks and Trails Account (LIL) – money is spent only for metro park and trails grants
- Local Trails Grants Account (LIL) – money is spent only for local trail grants and
- Zoos Account (LIL) – money is spent only by:
  - the Minnesota Zoological Garden,
  - the Como Zoo and Conservatory, and
  - the Duluth Zoo.
1. State Parks and Trails Lottery in Lieu (LIL)
The State Parks & Trails LIL account provides funds to maintain and operate state parks and trails.

FY2010 Financial Summary

Receipts
Receipts in State Parks & Trails LIL were approximately $5.2 million to help operate state parks and trails.

Expenditures
Expenditures by Parks and Trails for operations and maintenance of parks totaled approximately $4.9 million.

Fund Balance
The fund balance increased by approximately 32 percent. Lottery receipts have been increasing for the last several years and exceed expenditures.

FY2010 Activities and Accomplishments
Funds from this account are used to manage state parks and trails by maintaining the buildings and grounds for day and overnight use, paying labor costs and purchase supplies for these activities, providing a safe environment for visitors, providing orientation and visitor services, providing environmental education, resource management and interpretive services and emergency maintenance when floods occur or the infrastructure fails (i.e. broken water and sewer lines, power failure, etc).

These activities and accomplishments are carried out with a combination of funds from the State Parks, Lottery in Lieu, General Fund and State Parks Working Capital accounts.

Budget Trends FY2003 to FY2013
Revenues and expenditures have been steady since FY2002. The fund balance has grown during the years since FY2002 and is projected to continue the growth through FY2013.

Notes
1 Other receipts: credit agreement rebate and agency direct costs.
2. Metro Parks and Trails Lottery in Lieu (LIL)
The Metro Parks and Trails LIL funds are used by the Metropolitan Council to support the seven-county regional park system. This parks system includes 49 parks and park reserves and 6 special recreation features totaling about 53,000 acres open for public use. The system also has 29 regional trails totaling 177 miles. The funding pays for operational and maintenance costs on a cost reimbursement basis.

FY2010 Financial Summary

**Receipts**
Receipts in the Metro Parks and Trails LIL account were approximately $5.2 million.

**Expenditures**
The Metropolitan Council spent approximately $5 million to support the metro parks and trails systems. The Met Council allocates the Metro Parks & Trails funds to the metro region park boards. Recipients include the counties of Anoka, Washington, Ramsey, Scott, Carver, and Dakota; cities of St. Paul and Bloomington; the Minneapolis Park and Recreation Board; and the Three Rivers Park District.

**Fund Balance**
The fund balance increased approximately 26 percent this year. Lottery receipts and expenditures have been increasing for the last several years.

**Budget Trends FY2003 to FY2013**
Revenues and expenditures have been steady since FY2003. The fund balance has gradually increased and is projected to continue to increase through FY2013.

3. Local Parks and Trails Lottery in Lieu (LIL)
The Local Parks and Trails LIL grants are made to local units of government for the maintenance and operations of local parks and trails. Counties, cities, and towns are eligible for the grants. The FY2010 budgeted amount for the grants was $705,000.

FY2010 Financial Summary

Receipts
The Local Parks & Trails LIL account receipts totaled approximately $704,000.

Expenditures/Grants
Parks & Trails grants to local units of government totaled approximately $811,000.

Fund Balance
The fund balance increased approximately 21 percent in FY2010. Lottery receipts have been increasing for the last several years.

Budget Trends FY2003 to FY2013
Revenues and expenditures have been steady since FY2006. The fund balance has been increasing steadily since FY2003, and that trend is projected to continue through FY2013.

4.  Zoo Grants Lottery in Lieu (LIL) Account
The Zoo Grants LIL account is used to fund a portion of the operations of three zoos in the state – the Minnesota Zoo, Como Zoo, and the Duluth Zoo.

FY2010 Financial Summary

Receipts
Receipts for the Minnesota Zoos LIL account totaled approximately $469,000.

Expenditures
The three zoos named in the legislation receive pass-through appropriations to support operations and activities of the zoos. The Minnesota Zoo received $160,000 and Como Zoo and the Duluth Zoo each received $160,000. The Minnesota Zoo, Como Zoo, and the Duluth Zoo use the zoo grant funds to help support general operations at the zoos.

Fund Balance
The fund balance declined approximately 9 percent this year. Lottery receipts have been increasing for the last several years but expenditures exceeded revenue in FY2010.

Budget Trends FY2003 to FY2013
Revenues and expenditures have increased from FY2003 to FY2010 and are projected to level off for FY2010 to FY2013. The fund balance decreased slightly for FY2010 but is projected to increase through FY2013.

TTY: (800) 657-3929
Creation and Purpose of the Account
The 2005 legislature created the Minerals Management Account in M.S. 93.2236 to maximize mineral revenue from state mineral trust lands. Mineral management responsibilities include state mineral evaluation and promotion, issuing leases for exploration and mining, negotiating royalty rates and rentals, and managing revenue transactions related to mining and exploration. The program also provides technical assistance to local governments on mineral resources and mining issues.

Sources and Uses of the Funds
Revenues from state mineral leases are collected from mining companies and distributed in accordance with state law to benefit the schools, the university, and the local taxing districts. The Minerals Management program objective is to maximize mineral lease revenues for the Permanent School Fund, the Permanent University Fund, and local units of government.

The funds and accounts that directly benefit from mineral income pay for a portion of the costs of state minerals lease and ownership activities. Twenty percent of the payments made under all state mineral leases are credited to this account to pay the costs associated with the administration and management of the state’s mineral resources. Money in the account is appropriated by the legislature to the commissioner for mineral resource management and projects to enhance future mineral income and promote new mineral resource opportunities.

School Trust Lands
The DNR manages 2.5 million acres of school trust lands, and an additional one million acres of school trust mineral rights. The school trust lands derive from three federal land grants in the early years of statehood. Sections 16 and 36 of each public land survey township area were granted to the state for the purpose of being applied to the schools of the state. Swamplands were granted to the state for the purpose of selling the lands to construct levees and drains. Internal improvement lands were granted for sale and use in infrastructure. By 1990, most of the high value agricultural, timber, and mineral lands had been sold. From that point on, the remaining lands were managed for leasing mining and timber, with minor amounts sold. The remaining lands from the three land grants were combined into what is known today as school trust lands, from which revenue goes into the Permanent School Fund. The net interest and dividends are distributed annually from the Permanent School Fund to the school districts throughout the state.

University Trust Lands
Within a few years after Minnesota statehood, the federal government conveyed 144 sections of land to the state for the use and support of a state university. These federal grant lands are
managed by the DNR for the state. Most of the lands have been sold, but 25,891 acres remain, along with an additional 21,319 acres of mineral rights. A significant portion of the permanent university fund lands contain valuable deposits of iron ore and taconite. Revenues from sales and leases are deposited in the Permanent University Fund.

FY2010 Financial Summary

Receipts
20% of iron ore and taconite rents and royalties receipts are deposited into the minerals management account each year. The other 80% is deposited into the permanent school and university trust funds based on land type. Total receipts deposited into this account for FY10 were $2.7 million.

Expenditures
Expenditures in this account support evaluation of state minerals, state mineral leasing, and state mineral lease administration. 70% of the costs are personnel, the remainder are rental, maintenance, communications, travel, and equipment costs. FY10 expenditures were $2.7 million.

At the end of each fiscal year the amount of the fund balance that exceeds $3 million is distributed to the permanent school and university funds in proportion to the revenue received into these two accounts. In FY10 $2 million was transferred out.

Fund Balance
Weak steel demand combined with idled mining facilities and blast furnaces owned by integrated steel producers resulted in reduced revenue. The fund balance declined by approximately 39 percent during FY2010 which will result in less money being transferred to the trust accounts in October. During the last four fiscal years, USS Keetac was the primary producer of taconite from University owned ore. The idled Keetac facility for most of FY2010 accounts for the reduction of University mineral royalties for FY2010. All six Minnesota taconite plants were back in production by May 2010 and by the end of FY2010, all six taconite plants were operating at full capacity. It is expected that all six plants will continue full capacity production through the FY2012-FY2013 biennium.

FY10 Activities and Accomplishments
The Division of Lands and Minerals negotiated new taconite leases with Northshore Mining Company and renegotiated taconite leases with Northshore Mining Company and Essar Steel. These new and renegotiated leases use a royalty escalator that will result in increased state mineral royalty income from taconite. In total, the division managed 121 iron ore and taconite leases that resulted in about $13.0 million in royalty and rental income from state mineral lands.

A new iron ore lease was negotiated with Magnatation, Inc. to recover iron ore from an iron ore tailings basin. Magnatation is using new technology that was originally evaluated as an Iron Ore Cooperative Research project. Magnatation currently holds two state mineral leases to recover iron ore from natural iron ore tailings that were deposited more than 50 years ago.

Notes:
1 Other receipts: credit agreement rebate and agency indirect costs.
2 $29,452 (the amount that exceeds $3 million) will be transferred to the trust accounts in October.
The division conducted one of its most successful non-ferrous mineral lease sales in January 2010. One hundred twenty-three bids were received that resulted in new state mineral leases. As of June 30, 2010, there were 426 state Metallic Mineral leases covering 151,525 acres in nine counties. Income from metallic mineral leases during FY2010 was $889,610, approximately 20% or $175,262 was deposited into this account. The division inspected 112 exploration drill holes throughout the state during the fiscal year.

The division also managed ten peat leases, six industrial mineral leases, and several stockpile sales, which resulted in $166,756 in state rental and royalty income.

**Budget Trends FY2006 to FY2013**

The fund balance is projected to increase substantially FY2011 through FY2013 due to an expected increase in mineral revenue as shown below. However, the fund balance never exceeds $3 million. Any balance over this amount is transferred to state trust funds.

Mining Administration Account
Natural Resources Fund
Fiscal Year 2010 Annual Report

Creation and Purpose of the Account
The Mining Administration Account was established in 2008 in M.S. 93.481. The account collects fees charged to owners, operators, or managers of mine for the costs associated with mine permitting.

Sources and Uses of the Funds
The 2008 law provided that ferrous mining (taconite and iron ore) administrative fees would be charged to owners, operators, or managers of mines and the revenues deposited to the new account. The revenues were appropriated to the commissioner of the Department of Natural Resources (DNR) to cover the costs of administering and monitoring permits to mine ferrous metals.

In the last months of FY2009, the law was amended to provide that deposits to the account would include all fees charged to owners, operators, or managers of mines under M.S. 93.481 and a new section, M.S. 93.482 (Reclamation Fees). The mining administrative fee was extended to include ferrous, nonferrous, peat, and scram mining.

Mineland Reclamation activities are directed toward controlling adverse environmental impacts of mining, preserving natural resources, and encouraging future land utilization planning, while at the same time promoting the orderly development of mining, encouraging good mining practices, and recognizing the beneficial aspects of mining. Supporting activities within mineland reclamation include (1) mine permitting, (2) site inspections, (3) wetland impact avoidance, minimization, and mitigation, (4) annual report and operating plan review, (5) research toward reclamation practice improvement, and (6) environmental review, on existing operations, which is otherwise unfunded. The costs of these mineland reclamation activities are paid by the users of the services – the permit holders.
FY2010 Financial Summary

Receipts
The fee revenues due at the end of FY2010 totaling approximately $500,000 were collected in advance of July 1, 2010 (as required by law) and deposited in FY2010 for use in FY2011.

Expenditures
The Division of Lands & Minerals expended approximately $424,000 for costs of the Mining Administration program. These costs include issuing permits to mine, reviewing annual operating plans and site inspections.

Fund Balance
The fund balance increased approximately 16 percent for FY10. FY09 was the first year that this account was used. Revenues exceeded expenditures in the first two years of operation.

FY10 Activities and Accomplishments
Accomplishments of the program included: (1) administering and monitoring seven taconite permits which resulted in 40 million tons of pellet production in 2010; (2) administering and monitoring two closure status taconite permits; (3) administering and monitoring two active scram mining permits; (4) administering and monitoring ten peat mining permits resulting in over 450,000 cubic yards of production in 2010; (5) amending numerous wetland mitigation and replacements plans; (6) planning for long-range hydrologic changes and in-pit stockpile at several operations; and (7) innovative reclamation projects at two facilities. The Mineland Reclamation program enforces mineland reclamation regulations at taconite, scram, and peat mining operations affecting over 250,000 acres of public and private land. In calendar year 2010, in conjunction with taconite permits, 57 acres of stockpiles and 168 acres of tailings basins were permanently reclaimed, and nearly 48,000 seedlings planted. In calendar year 2010, about 550 acres were reclaimed with the peat permit to mine.

Budget Trends FY2009 to FY2013
Each year the annual permit to mine fees are collected based on the number of companies holding permits in the previous calendar year, whether or not there was production at the facilities. For FY2010, the annual permit to mine fees collected were approximately $500,000. For FY2011, the revenue is estimated to be the same as FY2010 and expenditures are projected to remain at the same level. For FY2012 and FY2013, revenues and expenditures are projected to remain relatively stable. (Graph was adjusted for planned expenditures.)

Creation and Purpose of the Account
The Natural Resources Dedicated Receipts Account is the repository for the statutorily-appropriated dedicated accounts in the Natural Resources Fund. Each individual component account is accounted for separately according to its statutory authorities and requirements.

Sources and Uses of the Funds
Fund sources and uses for the accounts are described in the following pages. Revenues, expenditures, and fund balances are also included in the combined and individual account descriptions.
FY2010 Financial Summary

The two charts show the combined NR Dedicated Receipts accounts, first, totaled by DNR divisions in which they operate and, second, in a consolidated account statement. The individual accounts are presented after the charts.

Receipts

Approximately 56 percent of the total receipts in the Dedicated Receipts Account were from the Forestry Resource Assessment Products and Services Account. Next largest are the Easement, water & land crossing licenses on DNR lands (34 percent) and the Horse trail pass account (6 percent).

Expenditures

Approximately 82 percent of the expenditures in the NR Dedicated Receipts Account were made by the Division of Forestry (Resource Assessment account). The Division of Lands & Minerals had 24% of the expenditures and the Division of Parks & Trails about 4 percent of the total expenditures in the combined Dedicated Receipts Account.

Fund Balance

The fund balance declined by approximately 4 percent this year. Revenues have increased for the divisions of Eco & Water Resources and Lands & Minerals but have decreased for the divisions of Forestry and Parks & Trails.

Budget Trends FY2006 to FY2013
The fund balance is projected to remain stable through FY2013.

1. Forest Resource Assessment Products and Services Account
Division of Forestry

Statutory Authority
The Forestry Resource Assessment Products and Services Account were established in 2007 in M.S. 89.421. Sales of forest resource assessment products and services to internal DNR customers and to organizations/persons outside the department are authorized in three sections of statutes (M.S. 84.025, subd. 9; M.S. 84.026; and M.S. 84.0855).

Sources and Uses of Funds
The Resource Assessment Office provides assessment services of landscape resources for the Division of Forestry, DNR programs and outside organizations on a fee-for-service basis. The office also sells photographic and map products to the general public. Products and services include forest inventory survey design, data collection, and compilation; creation of data layers; and remote sensing (aerial photography, satellite imagery, and analysis, GIS services, image processing, aerial photo rectification). Revenues from all sales are credited to the Forest Resource Assessment Products and Services Account. The funds credited to the account pay for the operations of the program.

</tbody>
</table>

Receipts
Total receipts from sales of products and services totaled about $1 million in FY2010. Most of the work was conducted for the Division of Forestry although other divisions in the DNR, other state agencies and units of local government, and others, purchased forest resource assessment services and products. In FY2010, the Resource Assessment Office received 22 percent of Forestry core program support funding.
Expenditures
Expenditures in FY2010 were approximately $1.6 million. The office conducted more than 20 projects in FY2010 for a variety of customers and purposes. For example, as part of state land asset management, the DNR’s goal is to conduct a complete re-inventory of DNR commercial forestlands every 15 years. Toward that goal, the Resource Assessment Office in FY2010 re-inventoried about 126,000 acres. The office also conducts annual surveys of forest land for the National Forest Inventory and Analysis (FIA) Program. The office acquired aerial photographs of 12,000 square miles of forestland and provided technical services for remote sensing (satellite) and forest resource data collection.

Fund Balance
The ending fund balance for FY2010 was approximately 20 percent lower than the starting balance, reflecting that expenditures exceeded revenues for the year by approximately $500,000.

2. Horse Trail Account
Division of Parks and Trails

Statutory Authority
The Horse Trail Account was authorized in 2006 and effective Jan. 1, 2007 (M.S. 85.46). The horse trail pass is similar to other DNR passes, such as cross-country skiing passes. Persons 16 years old or older must have in their immediate possession a valid horse trail pass when they ride, lead, or drive a horse on land administered by the commissioner of the DNR (passes are not required on forest roads). A new commercial annual horse trail pass was established, effective January 2, 2010. The new pass will enable commercial riding facility owners to purchase horse trail passes that can be issued to riders that hire or rent horses from the facility.

Sources and Uses of Funds
Revenues from the sale of the horse trail passes are deposited into a dedicated account to address equestrian needs in the state-owned areas where the pass is required. The DNR manages more than 1,000 miles of horse trails and more than 500 horse campsites. The DNR works with an Equestrian Advisory Group on the horse trail pass program.

FY2010 Financial Summary
Receipts
Horse trail pass receipts in FY2010 totaled approximately $117,000, a slight decrease from FY09.

Expenditures
Expenditures in FY2010 from the account were approximately $74,000. This money is used for horse trail and equestrian facility improvements at state-owned facilities. The location of projects paid from this account included ten locations in state forests, parks and recreation areas. See the descriptions of projects in the resource list below.

Fund Balance
The fund balance increased by approximately 23 percent, in FY2010. Revenues have exceeded expenditures for the last several years

3. Burning Permit Account
Division of Forestry

Minnesota’s first forest protection efforts began in 1895 when the legislature enacted the Forest Preservation Act. The law was passed after the Hinckley fire of 1894 that killed more than 450 people. The Burning Permit Law was passed in 1918 after another forest fire destroyed Cloquet and most of Moose Lake. Before that, people could burn without restrictions. In 1993, the Division of Forestry of DNR was given complete responsibility for all aspects of open burning in Minnesota. The system of permits and fire warden enforcement reduces the incidence of wildfires.

Statutory Authority
The burning permit account was established in 2004 legislation to support an electronic burning permit system (ELS – electronic licensing system). M.S. 88.17

Sources and Uses of Funds
All burning permit fees collected pursuant to M.S. 88.17 are deposited in the Burning Permit Account. The funds are used to cover the costs of operating the burning permit system.

<tr>
<td><strong>Net Change for FY2010</strong></td>
</tr>
</tbody>
</table>

Receipts
Burning permits receipts in FY2010 were approximately $34,000, an increase of approximately 63% from FY2009.

Expenditures
No expenditures were incurred in 2010. During implementation of the ELS a mixture of state and federal funds were used to create the system and conduct training. Now that the system is activated and generating sufficient receipts, the current balance will be expended to cover burning permit system operations in 2011.

Fund Balance
The sale of more than $34,000 of burning permits – and no expenditures in FY2010 – increased the year-end fund balance by 125 percent.

4. Forest Bough Account
Division of Forestry

Statutory Authority
Bough buyers permitting were created in law in 2002 to help guide the sustainable harvest of boughs. The Forest Bough Account was established in 2004, in M.S. 88.6435.

Sources and Uses of Funds
Fees from the sale of permits issued to bough buyers are deposited in the forest bough account. The funds are used to pay the costs associated with balsam bough educational programs for harvesters and buyers. Permits are available through the DNR’s Electronic Licensing System at any location where hunting and fishing licenses are sold.

FY2010 Financial Summary

Receipts
Receipts from the sale of forest bough buyer’s permits totaled approximately $1,000 in FY2010.

Expenditures
The money in this account is used for educational programs and information provided to harvesters and buyers.

Fund Balance
The fund balance decreased by approximately 14 percent, during FY2010, expenditures exceeded revenues.

5. Water Permit and Inspection Account
Division of Eco & Water Resources

Statutory Authority
The DNR is required to review proposed projects that need water in excess of 100 million gallons per year, and to assess fees to recover the costs of review and inspections (M.S. 103G.301). This permitting and inspection work is necessary to ensure the long-term sustainability of Minnesota’s surface water and groundwater resources.

Sources and Uses of Funds
Fees are charged to applicants who propose to use large quantities of water as specified in the legislation. The responsibilities of Water Resource Management include project planning, environmental reviews, permit application reviews, and studies to assess the adequacy of the water resource and potential natural resource impacts. The receipts are credited to the Water Permit and Inspection Account to recover the costs incurred for the environmental review and permitting activities.

FY2010 Financial Summary

Receipts
Water permitting and inspection fees, charged according to a standard fee schedule, totaled approximately $60,000 in FY2010; a 19 percent increase. The Division of Eco & Water Resources permits and monitors about 7,000 large water users.

Expenditures
Expenditures for all activities in the program for FY2010 totaled $20,000, a substantial decrease from FY2009.

Fund Balance
The fund balance was approximately $40,000, a substantial increase from FY2009 due to the decrease in expenditures.

6. Land Management Account
Division of Lands and Minerals

Statutory Authority
The Land Management Account was created in 2005 to cover the costs for the DNR to administer the road easement program under M.S. 84.631 (road easements across state lands). Starting in FY2009, the statutory language was amended to add responsibilities to issue and monitor utility licenses under M.S. 84.415; prepare conveyances of easements to state, local, or federal governments under M.S. 84.63; prepare conveyances of unneeded state easements (easement releases) under M.S. 84.632; and prepare easements for access and egress to state trails under M.S. 85.015, subd. 1b. (M.S. 92.685).

In FY2010, the statutory language was amended to authorize joint applications for utility licenses for residential use, with one application fee for a joint application. The 2010 legislature also modified the supplemental application fee for water and land crossing utility licenses, and provided that if the fees collected were not sufficient to cover costs for the activity, the commissioner must otherwise reduce department costs and activities to carry out the requirements of the law.

Sources and Uses of Funds
Fees collected and credited to this account are received in conjunction with the services provided in reviewing easement applications and supplemental applications, preparing easements or easement releases, monitoring, and related actions. The account funds are expended to cover the costs of activities specified in each section of the statutes listed above.

FY2010 Financial Summary

### Receipts
Two new revenues, Water & Land Crossing License on DNR Land were deposited into this account in FY2010 causing revenues to increase substantially. In FY2010, receipts totaled $658,000.

### Expenditures
Expenditures were approximately $467,000 in FY2010. The general fund appropriation to the DNR for the utility licenses and road easement work was eliminated, and the receipts from the Land Management Account appropriated to the DNR to cover the expenses of reviewing and issuing utility licenses and road easements.

### Fund Balance
The fund balance increased by $192,000 due to the increase in revenues. A portion of this fund balance is monitoring fees that are paid in advance of construction. The construction may occur in a subsequent fiscal year. The commissioner is required to refund unobligated balance from the monitoring fee revenue upon completion of the construction.

Leases, licenses, and easements
7. License Center and Electronic Licensing System (ELS)
   Division of Fish & Wildlife – License Center and ELS

Statutory Authority
The Division of Fish & Wildlife maintains the License Center and Electronic Licensing System authorized in M.S. 84.027.

The License Center issues licenses, permits, registrations, passes, and processes other transactions through a Web-based Electronic Licensing System available from 173 registration agents (deputy registrars). The DNR St. Paul headquarters provides walk-up service and processes title and registration transactions that are mailed in. Currently 135 types of transactions are available online.

Sources and Uses of Funds
Several of the Natural Resources Fund accounts make use of the ELS: Water Recreation, Snowmobile, All-Terrain Vehicle (ATV), Off-Highway Motorcycle (OHM), Off-Road Vehicle (ORV), State Parks, Cross Country Ski, and Natural Resource Dedicated Receipts.

The money deposited into this account comes from issuing fees collected on the sale of horse trail passes and decorative bough buyers permits deposited into the NR Dedicated Receipts account to provide support for operation of the licensing system.

FY2010 Financial Summary

Receipts
Receipts from the issuing fees and interest on the account totaled approximately $13,000, a ten percent decrease from FY2009.

Expenditures
The online licensing system had expenditures from this account of approximately $3,000.

Fund Balance
Receipts exceeded expenditures in FY2010, resulting in an increase in the fund balance of approximately $10,300, or 37 percent.

Creation and Purpose of the Account
The Nongame Wildlife program was started in 1977. The Nongame Wildlife Checkoff and the Nongame Wildlife Management Account were established in 1980 legislation under M.S. 290.431. The principal objectives are the conservation of nongame wildlife species and management and conservation of their habitats. The program works to protect over 800 species of nongame wildlife including birds, mammals, reptiles, amphibians, fishes, and selected invertebrates such as butterflies and dragonflies. Examples of species that have benefited from the Nongame Wildlife’s Program are the osprey, common loon, peregrine falcon, trumpeter swan, and bald eagle.

Sources and Uses of Funds
The principal source of funding for this program is contributions by taxpayers on their state income tax and property tax forms, sometimes referred to as the “Chickadee Checkoff.” Individuals who file a state income tax return (M-1) or property tax refund claim (M1-PR) may donate to the Nongame Wildlife Program. Individuals designate on the form that $1 or more will be added to the tax or deducted from a refund and credited to the Nongame Wildlife Management Account. These donations are tax deductible on the following year’s tax form. Since 1989, corporations can also designate a contribution to the account (M.S. 290.432). The Nongame Wildlife Fund also benefits from direct donations to the account. These donations can be made through the DNR website and through estate donations that designate the Nongame Wildlife Program as a beneficiary.

The Nongame Wildlife Management Account is used solely for nongame wildlife management.

The Nongame Wildlife Management Program obtains additional project funds that match and supplement the funding received from state tax forms. Sources of additional money have included matching funds from federal State Wildlife Grants and from the Reinvest in Minnesota Critical Habitat Fund “Private Sector Matching Account” – which is derived primarily from the sale of conservation license plates. Other supplemental sources of funding have included DNR “lottery-in-lieu of tax” sales tax proceeds from the sale of state lottery tickets and Environmental Trust Fund allocations for projects recommended to be funded by the Legislative-Citizen Commission on Minnesota Resources (LCCMR) and approved by the Legislature. One such special project has been the creation of native plantings on lakeshores to enhance wildlife habitat and water quality.
FY2010 Financial Summary

Receipts
Revenues peaked in FY2007 and have continued to decline since then. FY10 receipts totaled approximately $1.1 million.

Expenditures
Expenditures totaled approximately $1.4 million.

Fund Balance
The fund balance declined by approximately 19 percent this year.

FY2010 Activities and Accomplishments
The six areas of emphasis for the Nongame Wildlife Program were:
- Habitat protection, bird conservation and management;
- Technical assistance;
- Educational programs, publications, and wildlife tourism;
- Research, surveys, and monitoring;
- Fundraising; and
- Operational planning.

Program priorities were aligned with Tomorrow’s Habitat for the Wild and Rare, the State Wildlife Action Plan, which identifies species of greatest conservation need and key habitats on which they depend. The Nongame Wildlife Program collaborates with a large number of partners to carry out its work. For FY2010, habitat protection accomplishments included working with DNR forest managers for wildlife conservation on state forest lands, advising on proposals for land exchanges and conservation easements, nominating Important Bird Areas, and participating in the Lights Out/Bird Safe Program in cooperation with Audubon Minnesota. Staff time funded by the Nongame Wildlife Management Account was supplemented by project funds (State Wildlife Grants, Landowner Incentive Program, and Environmental Trust Fund) to install lakeshore buffer zones of native vegetation and conduct bluffland management for timber rattlesnakes in southeast Minnesota.

Technical assistance was provided in support of state forest planning and management, to private landowners for management of blufflands and savanna habitats, and to other governmental agencies related to wind energy development, off-highway vehicle planning, and peatland management planning.

The website www.wildlifeviewingareas.com was expanded by 26 locations, making information for a total of 118 locations in Minnesota available for those seeking wildlife viewing opportunities over the web.

A preliminary evaluation was conducted to evaluate the use of an aerial survey methodology to enumerate wolf numbers in three study areas. Wolves were radio-collared with GPS collars to plot movements and home ranges in relation to aerial survey routes. A disease screening protocol was developed to assess disease prevalence in Minnesota’s wolf population for evaluation of disease exposure and occurrence for long-term assessment of disease influence on the population.

Notes
† Other receipts: credit agreement rebate and agency direct cost.
Research and surveys were conducted for a variety of nongame wildlife species of conservation concern, including northern goshawk, common loon, timber rattlesnake, Topeka shiner, and wood turtle. Information from these and other studies is being used to revise the state list of threatened and endangered species.

In the area of fundraising, in addition to continuing publicity for the tax checkoff, the Nongame Wildlife Program is responsible for promotion of Minnesota’s conservation license plates. Revenue from the sale of conservation license plates is deposited in the Minnesota Critical Habitat Private Sector Matching Account, and some of those proceeds can be matched to Nongame Wildlife Checkoff donations.

**Budget Trends FY2003 to FY2013**

From FY2003 through FY2007, the number of contributors to the tax checkoff declined but the average contribution increased, resulting in a slight upward trend in revenue. Expenditures have increased more slowly, but have also trended slightly upwards. Minnesota’s checkoff has been very successful compared to those in other states, currently generating more revenues than similar checkoffs in the states of New York and California combined. Contributing factors to this success have been a strong conservation ethic among Minnesota citizens, a strong state economy, and annual dedicated investments in publicizing program accomplishments and needs.

The fund balance is projected to decline further through FY2013. Continued use of creative strategies to increase checkoff revenue and supplemental funding will be needed to sustain or grow program efforts and outcomes.

TTY: (800) 657-3929
Creation and Purpose of the Account
The first legislation for the registration of snowmobiles in Minnesota was enacted in 1967. The Snowmobile Trails and Enforcement Account was established in 1982 to pay for grants to counties and municipalities for construction and maintenance of snowmobile trails; to acquire, develop, and maintain state trails; to provide snowmobile safety programs; and to administer and enforce snowmobile laws (M.S. 84.83).

Sources and Uses of the Funds
Fees from the registration of snowmobiles, trail pass, and unrefunded gasoline taxes attributable to snowmobile use are the main sources of funding in the Snowmobile Trails and Enforcement Account. The account’s funds may be spent only as appropriated by law, for:

- A grant-in-aid program to local units of government for construction and maintenance of snowmobile trails; see Grant Outcomes website
- Acquisition, development, and maintenance of state recreational snowmobile trails;
- Snowmobile safety programs; and
- Administration and enforcement of the laws concerning snowmobiles in M.S. 84.81 to 84.91, and grants to local law enforcement agencies.
FY2010 Financial Summary

Receipts
The principal sources of revenues for the snowmobile account were snowmobile registrations, trail permits and license issuing fees (50 percent), and unrefunded gasoline taxes attributable to snowmobile use (48 percent). FY10 revenues totaled $12.8 million.

Expenditures
The Division of Parks & Trails made up 83 percent of the expenditures. Expenditures by the Enforcement Division, including grants to local enforcement agencies, were 12 percent of the expenditures. FY10 expenditures totaled approximately $14 million.

Fund Balance
The fund balance declined by approximately 18 percent this year due to less roll-forward balance. However revenue is up slightly due to a good snow season. Snowmobile activity is dependent on weather conditions

FY2010 Activities and Accomplishments
The Division of Parks & Trails developed, managed, and maintained snowmobile recreational trails that were open to the public. More than 942 miles of snowmobile trails were open for public use. Parks & Trails administered grants-in-aid that were available to counties, cities, and towns to create and maintain locally initiated trails totaling 21,205 miles, through 181 grants. The Division was able to increase its maintenance level of effort to the Field Offices and the ability to provide additional training and monitoring of the Grant-in-Aid program as recommended in the 2003 OLAs report. This increase in effort has resulted in the termination of grants to one county during the past season.

The Enforcement Division provided law enforcement activities and safety and training services for snowmobilers at state parks, forests, and recreational trails. Approximately 15,000 hours of enforcement activities were provided including information, education and training, and law enforcement. Grants were made to local units of law enforcement to enforce state laws and rules for snowmobile use.

The Electronic Licensing System (ELS) operated from the Division of Fish & Wildlife, collected fees for snowmobile related activities in state parks, trails, and use areas. The expenditures from the snowmobile account paid for development and operation of the licensing system attributable to snowmobile activities.

In FY2010, Conservation Corps Minnesota received funds from various Natural Resources Fund accounts to support the Department of Natural Resources (DNR) program activities, including constructing, maintaining, and signing state trails including snowmobile trails.

Budget Trends FY2003 to FY2013
Expenditures have exceeded revenues since FY2007. The fund balance has been declining since FY2006, and the trend is projected to continue through FY2013.

State Land & Water Conservation (LAWCON) Account
Natural Resources Fund
Fiscal Year 2010 Annual Report

Creation and Purpose of the Account
The State Land and Water Conservation (LAWCON) Account was established in 2001 under M.S. 116P.14. The law designates the Department of Natural Resources (DNR) as the state agency to apply for, accept, receive, and disburse federal reimbursement funds granted to Minnesota from the federal Land and Water Conservation Fund Act. The DNR’s Division of Parks and Trails oversees the program and is the main liaison between the state and the National Park Service. To be eligible for funding, Minnesota prepares a Statewide Comprehensive Outdoor Recreation Plan (SCORP) that is updated every five years. The current plan covers 2008-2012.

Sources and Uses of the Funds
From 1965 to 2010, Minnesota has received $70 million from the federal Land & Water Conservation Fund (approximately $220 million in 2008 dollars). M.S. 116P.14 distributes fifty percent of each annual apportionment to projects developed, acquired, or maintained by local units of government. The State distributes these funds through the Outdoor Recreation, Regional Park, and Natural and Scenic Areas grant programs. The other fifty percent is allocated to state acquisition and development projects of the state outdoor recreation system as defined in M.S. 86A, and for administrative expenses necessary to maintain the state’s eligibility for the federal Land & Water Conservation Fund grant program. Most of the state projects have been sponsored by the Department of Natural Resources, although some projects have been sponsored by the MN Historical Society, the University of Minnesota, and the MN Department of Transportation.

Each year, the State identifies the specific acquisition and development projects to which its annual federal LAWCON apportionment will be obligated. As the projects are completed, the federal LAWCON funds are reimbursed to the State. All money received by the State for local units of government is appropriated annually and reimbursed to the project sponsor. All money received for state agency projects is deposited in the State LAWCON account.
FY2010 Financial Summary

Receipts
LAWCON reimbursement for projects and costs was approximately $238,000.

Expenditures/Grants
The Division of Parks and Trails spent (49 percent) and the remaining (51 percent) were for administrative expenses. Expenditures for this account were approximately $233,000 in FY10.

Fund Balance
The fund balance increased by approximately one percent this year. Revenues exceeded expenditures for FY2010.

FY2010 Activities and Accomplishments
The Division of Parks and Trails used the state portion to fund a construction project at Great River Bluffs State Park. The contact station office and shop complex were completed.

Budget Trends FY2003 to FY2013
The fund balance is projected to stay level through FY2013 assuming apportionments to the State continue at recent levels.

(888) 646-6367
TTY: (651) 296-5484
TTY: (800) 657-3929
Creation and Purpose of the Account
The Department of Natural Resources (DNR) manages 67 state parks, 7 state recreation areas, 8 state waysides, and 54 state forest campgrounds/day use areas. The State Parks Account was established in statutes in 2000 under M.S. 85.052, subd. 4.

Sources and Uses of the Funds
Fees paid by visitors who purchase products and services within a state park, state recreation area, or wayside, and for special state park uses under M.S. 85.052, are credited to the State Parks Account. The fees are from sales of permits, camping fees, and other visitor-paid fees.

Money in the State Parks Account is available to operate and maintain the state park system, under M.S. 85.055, subd. 2, when appropriated by the legislature. Costs of the DNR electronic licensing system attributable to state park permits also comes out of this account. Funds from this account represented approximately 12 percent of the total budget for the state park system in FY2010.
FY2010 Financial Summary

Receipts
Receipts were from three principle sources: camping fees (48 percent), park permits (36 percent), and park facility rentals and concessions (13 percent). FY10 revenues totaled $11 million.

Expenditures
Parks and Trails used the funds to operate and maintain the state's parks system, as directed by the legislature. FY10 expenditures totaled $10.6 million.

Fund Balance
The fund balance increased by approximately 60 percent this year. Revenues increased and expenditures have decreased slightly since last year.

FY2010 Activities and Accomplishments
The Division of Parks and Trails provide services to an estimated 9.1 million visitors, which includes nearly one million overnight guests. State Parks are similar to small cities in that water, sewer, power services along with safety and infrastructure (roads, parking lots, bathrooms, and shelters) are provided to these 9.1 million visitors. Parks and Trails provide windows on Minnesota's original landscape and do this by managing the natural and cultural resources on a quarter of a million acres. State Parks and Trails hold some of Minnesota’s most unique cultural and natural landscapes.

Staff at state parks sold 238,451 daily permits, over 120,000 year-round permits and served more than a quarter of a million visitors (266,000) mostly young families with children through hands-on naturalist programs. More than two million visitors were served through interpretive displays and electronic touch screen messaging.

In FY10, four state recreation areas (SRA) generated revenue.

<table>
<thead>
<tr>
<th>Visitors</th>
<th>Revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Big Bog SRA</td>
<td>82,364</td>

</tr>
<tr>
<td>Red River SRA</td>
<td>83,929</td>
</tr>
<tr>
<td>MN Valley SRA</td>
<td>167,592</td>
</tr>
</tbody>
</table>

Funds from this account are used to manage state parks, state recreation areas, state wayside, and state forest campground day use areas by maintaining the buildings and grounds for day and overnight use. The money is also used for labor costs, supplies for these activities, providing a safe environment for visitors, providing orientation and visitor services, providing environmental education, resource management, interpretive services and emergency maintenance when floods occur or the infrastructure fails (i.e. broken water and sewer lines, power failure, etc.).

These activities and accomplishments are carried out with a combination of funds from the State Parks, Lottery in lieu, General Fund and State Parks Working Capital accounts.

Budget Trends FY2003 to FY2013
Revenues and expenditures in the State Parks Account have grown at a steady pace since FY2002 and are projected to continue that trend from FY2011 to FY2013. The fund balance is projected to increase from FY2010 to FY2013.

Water Recreation Account
Natural Resources Fund
Fiscal Year 2010 Annual Report

Creation and Purpose of the Account
The Water Recreation Account was created in 1985. The account was established to fund water recreation programs such as public water access, boating facilities, small craft harbors, and water safety (M.S. 86B.706).

Sources and Uses of the Funds
Money deposited in the Water Recreation Account comes from these sources:
- Fees from registration and titling of watercraft
- Unrefunded gasoline tax attributable to watercraft use
- Mooring fees and receipts from the sale of marine gas at state-operated or state-assisted small craft harbors and mooring facilities
- Fees for permits issued to control or harvest aquatic plants other than wild rice
- Fines and other payments collected from persons convicted of violations of the law under Minnesota Statutes Chapter 86B (Water Safety, Watercraft, and Watercraft Titling)

Money in the Water Recreation Account can be used for these purposes:
- Acquisition, development, maintenance, and rehabilitation of public water access and boating facilities on public waters; lake and river improvements; and boat and water safety
- Maintenance, operation, replacement, and expansion of state-operated or state-assisted small craft harbors and mooring facilities, and the debt service on state bonds sold to finance these facilities
- Administration and enforcement of Chapter 86B as it pertains to watercraft titling and licensing and the use and safe operation of watercraft
- Grants for county-sponsored and administered boat and water safety programs
- State boat and water safety efforts
- Management of aquatic invasive species
- Management of aquatic plants through permitting to gather or harvest (other than wild rice from public waters), to transplant, or to destroy harmful or undesirable vegetation

Within these statutory requirements, the Legislature directs, through funding bills, that specific amounts of money from the Water Recreation Account will be used for particular projects or purposes.
FY2010 Activities and Accomplishments

Division of Parks & Trails
Parks & Trails operates 1,595 public water access sites providing water access to the public. Through these water access sites, gateway opportunities are provided for aquatic recreation, boating, fishing, and other activities. Water Recreation Program funding supports the acquisition, development, operations, maintenance, and improvement of these sites. Parks & Trails also develops, maintains, and manages 4,397 miles of public water trails for canoeing, kayaking and boating on 31 rivers and the North Shore of Lake Superior. Parks & Trails operates the program of small craft harbors/safe harbors on Lake Superior, including two Department of Natural Resources (DNR) owned marinas.
http://www.dnr.state.mn.us/parks/index.html

Division of Enforcement
The Enforcement Division conducts boating safety patrols on Minnesota’s lakes and waterways. In 2010, over 24,600 hours of conservation officer patrol time were logged for boating safety enforcement activities. The components include enforcing personal watercraft laws, preventing introduction of invasive species in state waters, and public access enforcement. Water Recreation funds cover personnel costs related to water recreation activities, radio, vehicle, and watercraft expenses. In addition, 73 out of 87 counties participated in the boat and water safety grant program funded through the Water Recreation Account. The counties are mandated by law to: enforce the boating safety statutes & rules, place & maintain waterway markers, investigate boating accidents & drownings, issue event & temporary structure permits, inspect rental craft and perform search, rescue & recovery operations.
http://www.dnr.state.mn.us/enforcement/index.html

Division of Fish & Wildlife – Fish Management
Fisheries’ aquatic plant management program protects native vegetation in public waters and the aquatic environment, while allowing lakeshore owners to control some aquatic vegetation in order to get recreational water access. Healthy aquatic vegetation is essential for fish and wildlife, water clarity, limiting shoreline erosion, and preventing establishment of non-native invasive aquatic plants. The division also expended funds on lake and stream improvements which included installing an aeration system, invasive species control and shoreland restoration through native plantings. Funds were also directed to projects to outreach, education and information.
http://www.dnr.state.mn.us/fisheries/index.html

Division of Fish & Wildlife – Electronic Licensing Center (ELS)
The License Center issues all watercraft registrations and titles through a Web based ELS available from 173 registration agents (deputy registrars). The St. Paul headquarters has a walk-up license service counter and mail-in for registration and title renewal transactions. Currently 135 different transactions are available online. In FY2010, 814,359 boats were registered statewide.
http://www.dnr.state.mn.us/fishwildlife/license/index.html
Ecological Resources

Ecological Resources coordinates delivery of the DNR's aquatic plant management and the aeration permit programs that are administered by the Section of Fisheries. The division also conducts environmental review activities directed toward conserving aquatic habitat, enhancing water recreation opportunities, and providing aquatic resource information to decision makers for hydropower and hydroelectric plants and facilities and metropolitan water management planning activities. In 2010, 3,726 aquatic plant management permits were issued to 9,690 lakeshore property owners living on 873 lakes; 300 aeration permits were also issued. Ecological Resources supported these regulatory efforts by responding to 17 requests to review permit decisions, issuing 30 variances, conducting 46 pesticide use inspections, and investigating one citizen complaint of pesticide misuse. Ecological Resources managed, coordinated, and provided review and comment on 19 hydropower plant/facility proposals, plans or operations and ten metropolitan water management plans in various stages of the review process. In addition, Ecological Resource staff worked collaboratively with the Division of Waters and local governments, citizens, and water recreational users to develop new shoreland rules to improve and protect the scenic, recreational, and ecological values of lakes and rivers. In FY2010, $725,000 was transferred out of the Water Recreation Account and deposited in the Invasive Species Account (see Invasive Species Account section). Funds in the Invasive Species Account are appropriated to the DNR and used by the Division of Ecological Resources to manage aquatic invasive species. Those management activities include, increasing public awareness about invasive species and actions to prevent their spread, inspecting watercraft at public water accesses, providing grants and technical assistance to groups that are managing aquatic invasive species, and supporting research to develop better management techniques.

http://www.dnr.state.mn.us/eco/index.html

Division of Lands and Minerals

Lands and Minerals provide real estate and land survey services for the ongoing management of publicly-owned water recreation properties. The services include initial acquisition of land by purchase or lease and ongoing real estate support related to the ownership and leasing.

http://www.dnr.state.mn.us/lands_minerals/index.html

Division of Waters

Waters evaluates and issues permits for water accesses and dredging projects that provide recreational boating opportunities, participates on interstate and interagency recreation management planning and activities on the Upper Mississippi River, oversees the implementation of local regulations intended to improve and protect the scenic, recreational and ecological values of wild and scenic rivers, coordinates the development of dam operating plans, monitors drought/flood conditions, and collects lake level and stream flow data that are useful for recreational boating. The Division also supports activities that provide for the maintenance of water levels and flows for recreation, economic, and environmental purposes. Maintenance activities related to water level control structures
and dams include structural repairs, debris removal, and removal of illegal modifications to water level control structures, and water level gage installation and replacement. These activities prolong the life of the water level control structure and help to maintain lake levels and authorized runout elevations at lake outlets. Lake level and stream flow information are available at [www.mndnr.gov/waters](http://www.mndnr.gov/waters) and [http://www.dnr.state.mn.us/waters/index.html](http://www.dnr.state.mn.us/waters/index.html).

**FY2010 Financial Summary**

**Receipts**
Fees for watercraft registration, license issuance, and watercraft titling collectively made up approximately 43 percent of the available funds in the Water Recreation Account. Unrefunded gasoline taxes on watercraft (transfers in to the account) made up slightly more than half of the available funds. Total receipts and transfers in were about $17.3 million.

**Expenditures**
The Division of Parks and Trails expenditures were approximately 55 percent of total expenditures in the Water Recreation Account. The Enforcement Division expenditures were about 22 percent of total expenditures.

**Fund Balance**
The fund balance increased by approximately 45 percent in FY2010. Unrefunded gasoline tax has been slowing increasing and expenditures decreased slightly for Fish and Wildlife and Ecological Resources from last year.
