
2018-19 Base Budget Report

Laws of 2015, First Special Session, Chapter 4,
Article 4, Section 142
1/27/2017

Introduction

This report explores the central question of what is the DNR’s 2018-19 base budget including our statutory, direct, and open appropriations. As background, a statutory appropriation generally provides an agency the legal authority to collect a revenue and to spend it. By contrast, a direct appropriation caps the spending authority at an amount set in law. Session law has a “legal lifespan” of two years unless stated otherwise while statutory authority is ongoing until amended unless an expiration date is stated.

A third type of appropriation is an “open” appropriation. These appropriations have authority outlined in statute that allows the agency to spend as much as they need for a specific purpose. An example of an open appropriation is our open appropriation for fighting forest fires. Because it is in the public’s best interest that we can respond quickly unhampered by spending authority, the legislature approved this funding mechanism for this activity.

To help readers navigate our complex budget more easily, we organized the reports in two sections—1) direct appropriations and 2) statutory and open appropriations. Both sections include funding totals for the agency and divisions by fund and year, descriptions of how each appropriation is used, the legal authority for each appropriation, and additional fiscal information to assist a reader in navigating the our budget in the state’s budget system, accounting system, or online citizens portal.

Additionally, the first section (direct appropriations) also shows riders from 2016-17 and riders prior to 2016-17 (if relevant). It provides 1) the full rider language, 2) the year it originated unless prior to 1995, and 3) when the funds were incorporated into DNR base funding (if relevant). The report shows rider amounts in 2018-19 even though these have yet to be legally established. We presented information in this way to make the report easier to understand for the reader. Please note that this presentation does not reflect our preference for how Laws of 2017 should be constructed.

A few technical notes on the data:

1. The direct appropriation section shows the total appropriated amount in the corresponding year. The statutory and open appropriation section shows estimated expenditures as entered into the budget system in preparation for the 2018-19 biennial budget effort.
2. The direct appropriation section includes all current law appropriation in the 2016-17 and base for 2018-19 biennia. The statutory and open appropriations section also shows fiscal activity for both biennia, but only includes appropriations with anticipated expenditures in the 2018-19 biennium.

3. It was determined in consultation with the legislature that the following funds were out scope for this report: Environment and Natural Resources Trust Fund, Outdoor Heritage Legacy Fund, Parks and Trails Legacy Fund, Clean Water Fund, Federal Fund, and Bond/Capital Funds.

This report was originally submitted on October 15, 2016 as directed by Minnesota Laws 2015 First Special Session, Chapter 4, Article 4, Section 142. The legislature requested additional information by January 27, 2017. This report was prepared in response to that request.

BASE BUDGET REPORT

The commissioners of agriculture, natural resources, and the Pollution Control Agency shall each submit a report that contains the details of their base budgets, including prior appropriation riders, to the chairs and ranking minority members of the house of representatives and senate committees and divisions with jurisdiction over the environment and natural resources by October 15, 2016.

Preparing this report took approximately 130 hours and cost approximately \$4,507.
