Minnesota Department of Natural Resources

June 2009

HIGHLIGHTS

Introduction

In 2007 and 2008, studies were conducted on the Paul Bunyan and Heartland State Trail during the summer, which extends from the Saturday of Memorial Day weekend to Labor Day. Both trails are non-motorized. The Paul Bunyan study covers the 64 miles of trail from Baxter to the Heartland Trail (maps in Appendix A). The Heartland study covers the 47 miles of trail from Park Rapids to Cass Lake. Both studies are updates of work done in the 1990s.

This report is intended to highlight the findings in the studies. A full set of tables of findings can be found in Appendix A. The trail survey instrument is in Appendix B.

Methodology

The trail studies have two components: counting users by trail activity, and collection user characteristics and opinion through a mail survey (survey instrument is in Appendix B). For the first component, a field person travels the trail and counts users during nominal one-hour sampling blocks. For the other component, the field person recruits users for a mail survey by getting the users name and address; a mail survey is then sent to a few days later. Both the survey and counting dates, times and places follow a statistical sampling plan. Sample counts are statistically projected to full summer use quantities.

Administration of trail studies		
Item	Paul Bunyan 2007	Heartland 2007-08

Valid addresses	350	343
Surveys returned	308	299
Return rate	88%	87%

Who are the trail users?

A demographic profile of trail users can be formed by comparing the users from Minnesota to the general Minnesota population. Minnesotans make up 85% of Paul Bunyan use, and 73% of Heartland use.

Minnesota trail users in the 41 to 65 age range are over-represented on the trail; they are one-third of the general population and just over half of trail use. The oldest age class (over 65) is largely representative of the population. All other age classes are under-represented.

Trail users are comprised of largely equal portions of females and males, same as the general population.

Few trail users (less than 2%) are non-white and/or Hispanic, while the population has 14% in this race and ethnicity category.

Age distribution of trail users from Minnesota			
Age Class	Minnesota Population, 2007* (percent)	Paul Bunyan (percent)	Heartland (percent)
12 or under	17%	9%	11%
13 to 18	8%	4%	4%
19 to 40	30%	18%	20%
41 to 65	33%	55%	52%
over 65	11%	13%	13%
Total	100%	100%	100%
* Population estimates from U.S. Census Bureau.			

Trail users (25 years old or older) are well educated. Nearly two-thirds have at least a bachelor's degree, which is about twice as high as the general population.

Lastly, trail users have higher annual household incomes (median near \$75,000) than the general population (median near \$58,000).

Trail use

The trails receive some 75,000 to 80,000 hours of use during the summer (see table on next page). The use is split about 40% to 60% for weekends/holidays and weekdays, respectively. Biking is by far the top activity; it is followed by walking/hiking.

The majority of use on both trails (54% for each) comes from tourists, who have traveled at least 100 miles from home. Local users (within 10 miles of home) comprise about one-third of trail use.

Most trail use (55% to 56%) is by adults aged 41 to 65. Teens and children (under 19) make up 12% to 14% of use. Those over 65 years account for 11% to 14% of use, similar to that accounted for by teens and children.

Summer trail use by day of week and activity

	----- Paul Bunyan -----		----- Heartland -----	
	<u>Trail</u> <u>user-hours</u>	<u>Percent of</u> <u>user-hours</u>	<u>Trail</u> <u>user-hours</u>	<u>Percent of</u> <u>user-hours</u>
Overall	81,711	100%	74,419	100%

Run/jog	4,017	5%	2,234	3%
Other	738	1%	3,536	5%

Trail use trends

Trends are assessed over the same trail and trail segments. This is a standard approach. It is the same trend method retailers apply when they report “same-store” sales change.

Trail studies are done over different lengths of time. To adjust for this—so changes can be compared between trails—each trend is put on a ten-year basis by assuming a constant linear change in user-hours per year.

Trail use monitoring has expanded to more and more trails in the Twin Cities since the late 1990s. That is why more trail are included in the

Recent use trends for non-motorized trails

(Note: the "standardized 10-year trend" assumes the same linear change in user-hours per year)

A. Summer use trends on state trails	<u>Standardized</u> <u>10-year trend:</u> <u>Percent change</u>
Paul Bunyan, 1996 to 2007	-48%
Heartland, 1998 to 2007	-54%
Root River & Harmony-Preston Valley, 1997 to 2008	-34%
Gateway, 1997 to 2003	-31%
B. Annual use trends on Twin Cities metropolitan regional trails	
Nine trails from 1998 to 2007	-12%
Eleven trails from 1999 to 2007	-30%
Thirteen trails from 2000 to 2007	-24%
Fifteen trails from 2001 to 2007	-27%

trend analysis in the years following 1998.

The trend results indicate a drop in trail use on both state and Twin Cities regional trails. None of the trends is positive, and most show a decrease of in the general range of 25% to 50%.

For the state trails, the decline in use on weekends/holidays exceeded that on weekdays. For activities, in-line skating exhibited the largest decrease in use, followed by biking. Walking/jogging showed the smallest decrease, and actually increased 4% on the Paul Bunyan.

Tourist use on state trails declined more than that of locals (tourist are over 100 miles from home; locals live within 10 miles of the trail).

For ages, children and teens (under 19) had the steepest decline in use on state trails, while adults over 40 had the smallest decline. (This analysis was done on a per-capita basis to adjust for changing numbers of people in age classes between study years.)

Some of the preceding use trends are linked. Locals, who exhibited the smallest decline in use, dominate walking/jogging, routine exercise activities mainly done by adults on weekdays. Tourist dominate biking, and are more likely than locals to use the trail on weekends/holidays.

Experience while using the trail

When asked what they like most about the trail, four items rise to the top for each trail: the trail is quite/peaceful, scenic, a good place for exercise, and has no motorized vehicles.

Trail users experience few problems with other users. Some 90% checked “no problem” from a list of that response and 14 potential problems. When they did have a problem, the leading ones are trail users blocking traffic and passing without warning, common trail-courtesy occurrences.

Another potential problem is crowding, but nearly all trail users (96% to 99%) indicated that it was not an issue during their outing.

The first studies on the Paul Bunyan and Heartland in the 1990s were done when the trails were new. The overall experience ratings were superlative, some of the highest MN DNR has ever recorded for any activity or facility over the last 20 years. By 2007, ratings had dropped, with nearly all the drop due to a shift from “excellent” to “good.”

In their own right, the ratings in 2007 are high. Virtually all ratings are “good” to “excellent” and “excellent” exceeds “good” by a wide margin.

The drop in overall experience rating is probably due to same factor identified in the 1990s when examining ratings across nine trails. In the trail studies, users are asked to score their satisfaction with 20 trail facility and service items. The 20 items are made up of five safety/enforcement items, five information items, five facility items (e.g., benches), three maintenance items, and two general characteristic items (e.g., trail design).

Trail user ratings of overall trail experience

Paul Bunyan

<u>Rating</u>	<u>1996 (percent)</u>	<u>2007 (percent)</u>	<u>Change 1996 to 2007</u>
Excellent	82%	62%	-20%
Good	14%	37%	23%
Fair, poor, or very poor	<u>4%</u>	<u>0%</u>	-3%
Total	100%	100%	

Heartland

<u>Rating of overall</u>	<u>1998 (percent)</u>	<u>2007 (percent)</u>	<u>Change 1998 to 2007</u>
Excellent	82%	69%	-12%
Good	16%	29%	12%
Fair, poor, or very poor	<u>2%</u>	<u>2%</u>	0%
Total	100%	100%	

In the 1990s studies, one, and only one, group of items (trail maintenance) was consistently associated with lower overall trail ratings. In agreement with this finding, when the change in overall ratings from the 1990s to 2007 is compared with the 20 facility and service items, the trail maintenance group has the strongest association. Trail maintenance items are comprised of trail surface quality, maintenance of the trail, and management of vegetation in the trail corridor.

Trip characteristics

Trail users spend money on their trip and that spending generates jobs and income in the local economy of the trail. In 2007, summer trail users spent just over \$1 million on each trail. Most of that spending (90% or more) comes from trail users who reside outside the local economy of the trail, and the spending

represents “new” dollars to the local economy.

As noted previously, biking is the largest trail activity by far; biking accounts for two-thirds of trail use. A typical biking trip covers just under 30 trail miles, lasts close to three hours, has a party size near three, and most of the parties (about 80%) are composed exclusively of adults. Adults with children comprise just under 20% of biking parties.

Biking trip characteristics		
<u>Characteristic</u>	<u>Paul Bunyan</u>	<u>Heartland</u>
Miles traveled on trail (average)	28.7	28.1
Hours spent on trail (average)	2.7	3.1
People in party (average)	2.8	2.9
Party composition (% of parties)		
1 adult (over 18)	28%	29%
2 adults	37%	35%
3 or more adults	16%	16%
Adult(s) with children (under 18)	18%	19%
Children only	<u>1%</u>	<u>1%</u>
Total percent	100%	100%

** Park Rapids to Cass Lake		

Summer trail use by age of trail users, 2007

A. All trail users

<u>Age class</u>	<u>Paul Bunyan*</u> (percent)	<u>Heartland**</u> (percent)
12 or younger	8%	10%
13 to 18	4%	4%
19 to 40	18%	20%
41 to 65	56%	55%
over 65	<u>14%</u>	<u>11%</u>
Total percent	100%	100%
<i>Median age</i>	<i>49.3</i>	<i>45.5</i>

* Baxter to Heartland Trail

** Park Rapids to Cass Lake

A. Per-capita trail use by Minnesotas (use hours from Minnesotans per 1000 Minnesotans)

<u>Age class</u>	<u>Paul Bunyan*</u>	<u>Heartland**</u>
Oveall (all ages)	13.4	10.5
12 or younger	7.1	7.4
13 to 18	5.7	5.2
19 to 40	8.5	7.7
41 to 65	22.2	16.3
over 65	16.2	9.9

* Baxter to Heartland Trail

** Park Rapids to Cass Lake

Recent use trends for non-motorized trails

A. Summer use trends on state trails**

<u>Trail, study years, and comparable segment</u>	First study <u>Total summer</u> <u>user hours</u>	Second study <u>Total summer</u> <u>user hours</u>	<u>Percent</u> <u>change</u>	<u>Standardized</u> <u>10-year trend:**</u> <u>Percent change</u>
Paul Bunyan, 1996 to 2007, Baxter to Hackensack	148,760	69,838	-53%	-48%
Heartland, 1998 to 2007, Park Rapids to Walker	118,337	60,878	-49%	-54%
Root River & Harmony-Preston Valley (RR & HPV), 1997 to 2008, Fountain to Preston and Isinours to Money Creek Woods	178,762	111,580	-38%	-34%
Gateway, 1997 to 2003, Cayuga Street to Pine Point Park	181,952	148,062	-19%	-31%

* Summer extends from the Saturday of Memorial Day weekend to Labor Day. Because summers vary in length, and because this affects comparability between studies, summer length is set by the second study.

** Assumes the same linear change in user-hours per year.

B. Annual use trends on Twin Cities metropolitan regional trails

<u>Metro regional trails (annual occasions in 000's)</u>	<u>First year</u>	<u>Year 2007</u>	<u>Percent</u> <u>change</u>	<u>Standardized</u> <u>10-year trend:**</u> <u>Percent change</u>
Nine trails from 1998 to 2007	3,941	3,516	-11%	-12%
Eleven trails from 1999 to 2007	5,256	3,980	-24%	-30%
Thirteen trails from 2000 to 2007	5,052	4,209	-17%	-24%
Fifteen trails from 2001 to 2007	5,437	4,547	-16%	-27%

** Assumes the same linear change in user-hours per year.

Appendix B:

Trail user survey instrument (6 pages)

Note: Survey instruments are the same except for the specific places users gain access to the trail (question 5)

2007 Paul Bunyan State Trail Summer Survey

PLEASE ANSWER THE FOLLOWING QUESTIONS FOR THE TRAIL VISIT WHEN YOU AGREED TO BE PART OF THIS SURVEY:

1. Please rate your overall experience on the trail on the day of your visit. (Please check one)

- a)____Excellent b)____Good c)____Fair d)____Poor e)____Very poor

2. What was your main trail activity on the day of your trail visit? (Please check one)

- a)____Bicycling f)____Jogging/running
b)____Mountain bicycling g)____Wheelchair use
c)____In-line skating/roller skiing h)____Horseback riding
d)____Dog walking i)____Other (Please specify_____)
e)____Walking, hiking, or pushing stroller

3. How did you get to the trail? (Please check one)

- a)____By car e)____With a large group in bus or van
b)____On foot f)____Horseback riding
c)____On a bicycle g)____Other (Please specify_____)
d)____On in-line skates

4. What is the one-way driving distance from your permanent home to the trail?

_____Miles (approximately)
_____Don't know

5. Where did you get on the trail? (Please check one)

- a)____The Arboretum in Baxter f)____Backus
b)____Merrifield g)____Hackensack
c)____Nisswa h)____Walker
d)____Pequot Lakes i)____Other (Please specify_____)
e)____Pine River

6. Did you travel on the trail round-trip or one-way? (Please check one)

_____Round trip, returned to my starting point on the trail
_____One way on the trail

7. About how many miles did you travel on the trail, in total?

_____Miles
_____Not sure

8. What day of the week were you on the trail? (Please check one)

- a)____Sunday e)____Thursday
b)____Monday f)____Friday
c)____Tuesday g)____Saturday
d)____Wednesday

9. What time of day did you begin using the trail? *(Please write time and circle a.m. or p.m.)*
_____ a.m. / p.m.

10. About how many hours were you on the trail?
_____ Hours
_____ Not sure

11. Was the trail too crowded for your enjoyment? *(Please check one)*
a) _____ No
b) _____ Yes, but I used the trail anyway
c) _____ Yes, so I changed plans, used another part of the trail
d) _____ Yes, so I didn't use the trail for as long as originally planned
e) _____ Yes, so in the future I'll only use the trail at less busy times
f) _____ Yes, too crowded, unlikely that I'd return to this trail

12. Why did you choose to come to this trail? *(Please check **all** that apply)*
a) _____ Never been here before, wanted to check it out
b) _____ Come to this trail regularly
c) _____ Easy to get to, convenient location
d) _____ Safe place to ride/walk/skate
e) _____ Vacationing in this area
f) _____ Was recommended to me by family
g) _____ Other *(Please explain _____)*

13. Did you have any problems or conflicts with other trail users? *(Please check **all** that apply)*
a) _____ No problems with other trail users – *please skip to next question*
b) _____ Other trail users blocking traffic, not keeping right
c) _____ Other trail users passing without warning
d) _____ Other trail users going too fast
e) _____ Other trail users going too slow
f) _____ Unfriendly, discourteous behavior by others
g) _____ Irresponsible or unsafe behavior by others
h) _____ Problems with other people's pets
i) _____ Other trail users created feelings of insecurity, or concerns about personal safety
j) _____ Non permitted trail uses (i.e., all-terrain vehicles, cars, motorcycles)
k) _____ Graffiti
l) _____ Vandalism
m) _____ Problems with large groups or special events on the trail
n) _____ Discharge of firearms by other trail users
o) _____ Conflicts with trail users not using the treadway designated for their use
p) _____ Other *(Please explain _____)*

14. Please rate your satisfaction or dissatisfaction with the following trail facilities or services.

Please circle VS if very satisfied, S if satisfied, N if neutral, D if dissatisfied, VD if very dissatisfied.

If it doesn't apply at all to your use of the trail, circle NA (not applicable). If you have any specific comments on how and where we could make improvements, please jot it down.
