

Proposed Changes to Bag and Size Limits

Minnesota/Wisconsin Border Waters of the Mississippi River

The Minnesota and Wisconsin DNRs are jointly reviewing fishing regulations on Pools 3-9 of the Mississippi River border waters from Hastings, MN / Prescott, WI downstream to the Iowa border. Bag and size limits on the border waters have been largely unchanged since the 1940s and 1950s. The last regulation changes were in 1990, when minimum size limits were implemented for Walleye (15 inches) and Bass (14 inches).

The Mississippi River has a tremendous ability to produce fish and the fishery has been very resilient to channel alterations, pollution, watershed inputs, and intensive fishing pressure. Currently, the populations of most fish species are in good shape and provide exceptional fishing. However, there are signs of stress. Habitat continues to change in the aging reservoirs created by locks and dams, and for some species the available habitat is shrinking as sedimentation reduces depth in backwater areas. Changes in hydrology, water quality, vegetation, presence of invasive species have also influenced the fish community. Invasive bighead and silver carp could also add additional stress to the fish community in the future.

In addition to the environmental stressors above, fishing pressure and harvest remain high on the river. Fishing regulations on the river have generally been more permissive (high bag limits, year round season on all species, etc.) than on inland waters of either state. Even though the fishery has held up well, there is concern among biologists and anglers that the fishery may not be able to withstand these stressors and high levels of harvest going into the future. The review of existing regulations is an opportunity to be proactive and potentially make adjustments that will protect the quality of the fishery and the fishing opportunities that currently exist.

In May 2018, public meetings were held in Red Wing, Wabasha, Winona, La Crosse and Prairie du Chien. Attendees were asked a series of questions to get their opinions on the quality of fishing on the river, what they think about current bag and size limits, and what regulation changes anglers would like to see. These questions were also made available online and a total of 850 responses were received. A summary of the responses can be viewed [HERE](#) or by contacting lakecity.fisheries@state.mn.us. Input received from the public meetings and online forms was reviewed along with available fisheries data to develop recommendations for changes to existing bag and size limits.

The Minnesota and Wisconsin DNRs are now seeking public input on the recommended changes to daily bag and size limit regulations. Proposed changes are:

White Bass:

Proposed Regulation = Daily bag limit of 10 with no size limit.

Current Regulation = Daily bag limit of 25 with no size limit.

Largemouth/Smallmouth Bass:

Proposed Regulation = Daily Bag limit of 5 and a 14" min. length (NO CHANGE)

Channel/Flathead Catfish:

Proposed Regulation = Daily bag of 10 (combined), only 1 over 30 inches daily.

Current Regulation = Daily bag of 10 (MN) and Daily Bag of 25 (WI), with no size limit in either state.

Northern Pike:

Proposed Regulation = Daily Bag limit of 3, with only 1 over 30 inches daily

OR

Daily Bag limit of 2, with no size limit

Current Regulation = Daily Bag limit of 5, with no size limit.

Sunfish*, Crappie, and Yellow Perch:

Proposed Regulation = Daily Bag limit of 10 OR 15 Sunfish

Daily Bag limit of 10 OR 15 Crappie

Daily Bag limit of 10 OR 15 Yellow Perch

Current Regulation: Daily bag limit of 25 Sunfish, 25 Crappie, and 25 Yellow Perch

*Sunfish includes Bluegill, Pumpkinseed, and Green Sunfish

Walleye and Sauger:

Split River Option

Proposed Regulation for Pools 3 and 4 = Daily Bag of 4 combined, 15 inch minimum length for Walleye, only 1 Walleye or Sauger over 20 inches daily.

Proposed Regulation for Pools 5, 5A, 6, 7, 8, and upper 9 = same as above, but only 2 Sauger in the Daily Bag.

OR

All Pools Option

Proposed Regulation for Pools 3-9 = Daily Bag of 4 combined, 15 inch minimum length for Walleye, only 1 Walleye or Sauger over 20 inches daily.

Current Regulation (for all Pools) = Combined Daily Bag of 6 with a minimum length of 15 inches for Walleye.

Shovelnose Sturgeon:

Proposed Regulation = Daily Bag Limit of 3 with no size limit.

Current Regulation = Daily Bag Limit of 10 with no size limit

Three public meetings have been scheduled to discuss the regulation proposals:

November 13– Red Wing Environmental Learning Center, 442 Guernsey Lane, Red Wing, MN

November 14– Winona Middle School, 1570 Homer Road, Winona, MN

November 15– Wisconsin DNR Service Center, 3550 Mormon Coulee Road, La Crosse, WI

All meetings will run from 6 to 8 pm. Information on the regulations proposal will be available in an “open house” format. There will not be a formal presentation, but information will be displayed on poster boards and staff from Minnesota and Wisconsin DNRs will be available for questions and discussion. Those interested in the regulation proposals are invited to come any time during the two hour meetings.

An online survey form will also be made available for those that cannot attend one of the public open house meetings.

Comments and completed questionnaires on the regulation proposals will be accepted through November 30, 2018. Input received will be used to make a final recommendation on regulation changes. The earliest any regulation changes would go into effect is March 2020 and there will be additional opportunities for public review and input in both states prior to any final decisions.

If you have questions about the regulation review process, please contact:

Summary of responses received during comment period

Responses collected during public meetings, from paper forms, and electronically distributed forms are all combined in the following results.

No analysis or filtering of data to address specific questions has occurred when preparing this summary.

Definitions

Daily Bag – is the total number of fish of a species or group of species that you can keep in one day.

Combined Bag – when two or more fish species are grouped into one daily bag limit.

Example – Walleye and Sauger have a combined bag limit on the Mississippi River. You can keep a total of 6 Walleye and Sauger in any combination.

Minimum length regulation – a fish would need to be at least X inches long before it could be kept.

Example – Northern Pike in Wisconsin's South Zone must be 26-inches long before they are legal to keep.

"1-Over" regulation – in a daily bag limit, you could only have one fish of this species over a certain length.

Example – In Minnesota inland waters, you can only keep 1 Walleye over 20 inches per day.

Definitions – length based regulations

"Slot Limit" – generally refers to a certain size range of fish that can or cannot be harvested.

Example – Lots of variation in length combinations have been used.
