

Conservation Focus Area (CFA) Status 2015-2025 MN Wildlife Action Plan

Conservation focus areas (CFAs) are places with the need for and/or the opportunity to focus conservation activities with multiple partners to improve habitat for and populations of Species in Greatest Conservation Need. They do not necessarily represent areas of highest ecological value. As part of the MNWAP, at least six CFAs will be selected for implementation from 2015 to 2025.
