## Birding at Carley State Park

Though small in size, this park is a great place for watching birds. Its woodland and riparian habitats attract warblers, vireos, flycatchers, thrushes and sparrows during migration and the breeding season. A total of 27 species of Neotropical migrant warblers have been recorded in the park.

In spring, walk along the wildflower trail for opportunities to see migrating warblers and wood ducks.

### Key

#### Occurrence

**Sp** - Spring (Mar—May)

**S** - Summer (Jun—Jul)

**F** - Fall (Aug—Nov)

**W** - Winter (Dec—Feb)

#### Abundance

**C** - Common (Present, relatively easy to find)

**U** - Uncommon (Present, not certain to be seen)

**O** - Occasional (Infrequent, may not return each year)

**R** - Rare (Observed at least once, may not return)

**Date:** Enter the date you saw the bird.

### Bird Identification Tips

When you observe a bird, make note of at least three characteristics.

**Location:** Where did you see the bird? (water, forest, feeder, lower branch, tree trunk, etc.)

**Body size and shape:** Compare to a known bird. (smaller than a...bigger than a...plump like a...slender like a...) Look at tail, legs and bill. (long, short, thick, thin, curved, straight)

**Colors and markings:** Look on wings, tail, back, belly, rump and head. (stripe above eye, white spot on tail, etc.)

**Sounds and movements:** How do they act and sound? (travel alone or in groups, in-flight wing position - soaring, flapping, flap and glide, etc.)
