Checklist created by Robert B. Janssen, Jerry Bonkoski and MNDNR. Data was gathered from MNDNR staff observations, public observations and Minnesota Ornithologist’s Union records. Nomenclature and organization of checklist based off of the *Check-list of North American Birds* (7th edition) as currently supplemented.

# BIRD CHECKLIST

JOHN A. LATSCH STATE PARK

Birding at John A. Latsch State Park

John A. Latsch State Park is near the heart of the Mississippi River flyway, an essential migration route for hundreds of bird species. It serves as a stopover point for migrants such as warblers, flycatchers, orioles, sparrows and thrushes. Peregrine falcons have been nesting on the cliff faces in the park for decades.

Hike up the River Overlook Trail for excellent woodland and bluff habitat used by breeding species such as tanagers, flycatchers and woodpeckers. Keep an eye out for soaring eagles, hawks and vultures using warm columns of air near the bluffs to rise above the valley.

Key

Occurrence

- Sp - Spring (Mar—May)
- S - Summer (Jun—Jul)
- F - Fall (Aug—Nov)
- W - Winter (Dec—Feb)

Abundance

- C - Common (Present, relatively easy to find)
- U - Uncommon (Present, not certain to be seen)
- O - Occasional (Infrequent, may not return each year)
- R - Rare (Observed at least once, may not return)

Date: Enter the date you saw the bird.

Bird Identification Tips

When you observe a bird, make note of at least three characteristics.

**Location:** Where did you see the bird? (water, forest, feeder, lower branch, tree trunk, etc.)

**Body size and shape:** Compare to a known bird. (smaller than a...bigger than a...plump like a...slender like a...) Look at tail, legs and bill. (long, short, thick, thin, curved, straight)

**Colors and markings:** Look on wings, tail, back, belly, rump and head. (stripe above eye, white spot on tail, etc.)

**Sounds and movements:** How do they act and sound? (travel alone or in groups, in-flight wing position - soaring, flapping, flap and glide, etc.)
