Birding Opportunities at Lake Carlos State Park

Lake Carlos is a good lake for viewing waterfowl in early spring and late fall.

Wetland areas along the Prairie Pothole Trail and at Schumachers Slough are excellent for waterbirds and marsh birds. The park contains many miles of trails through good woodland and grassland habitat, providing for a wide variety of birding opportunities especially during the spring and fall migration seasons when large numbers of warblers, vireos, flycatcher, thrushes and sparrows move through this area.

Season and Abundance Key

The **seasons** in the checklist are defined as follows:

Sp (Spring) = March, April, May

Su (Summer) = June, July

Fa (Fall) = August, September, October, November

Wi (Winter) = December, January, February

Abundance codes are defined as follows:

C = Common — present, relatively easy to find

U = Uncommon — observed, may be difficult to find

O = Occasional — may or may not be present in any year

R = Rare — has occurred at least once, may or may not be expected to recur

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January, 2001), prepared by the Minnesota Ornithological Records Committee.

This checklist contains the names of all birds that have been documented in the park by reliable observers. It was constructed by Robert B. Janssen, Jerry Bonkoski, and the MN DNR-Division of Parks & Recreation using observations of the above, park staff and other observers, as well as Minnesota Ornithologist's Union records and data contained in research reports. If you are interested in the specific sources used for a particular park, contact the Parks Division Resource Management Program Coordinator by telephone at 651-259-5594 or by mail at MN DNR-Parks, 500 Lafayette Road, Box 39, St. Paul, MN 55155-4039.
