# Birding Opportunities at Temperance River State Park

Temperance River State Park contains 534 acres, which includes the scenic Temperance River, rocky Lake Superior shoreline and boreal woodlands. Over 20 species of warblers breed within the park boundaries. The black-throated blue warbler can be found along the upper reaches of the river. Chestnut-sided, magnolia, yellow-rumped, black-throated green and black and white warblers are common. Horned and red-necked grebes, common loons, and red-breasted mergansers gather in April at the mouth of the Temperance River to feed. Merlins regularly nest near the campground. In October, flocks of snow buntings, mixed with Lapland longspurs and American pipsits can be seen along the roads, trails and shoreline.

## Season and Abundance Key

The **seasons** in the checklist are defined as follows:

**Sp** (Spring) = March, April, May

**Su** (Summer) = June, July

**Fa** (Fall) = August, September, October, November

**Wi** (Winter) = December, January, February

**Abundance codes** are defined as follows:

**C** = Common — present, relatively easy to find

**U** = Uncommon — observed, may be difficult to find

**O** = Occasional — may or may not be present in any year

**R** = Rare — has occurred at least once, may or may not be expected to recur

The names and taxonomic arrangement of species follows that of the Checklist of the Birds of Minnesota (January, 2001), prepared by the Minnesota Ornithological Records Committee.

This checklist contains the names of all birds that have been documented in the park by reliable observers. It was constructed by Robert B. Janssen and the MN DNR-Division of Parks & Recreation using observations of Mr. Janssen, park staff and other observers, as well as Minnesota Ornithologist's Union records and data contained in research reports.
