

Identification List of Known Calcareous Fens

Pursuant to the provisions of *Minnesota Statutes*, section 103G.223, the following described lands contain calcareous fens as defined in *Minnesota Rules*, part 8420.0935, subpart 2. These calcareous fens have been identified by the commissioner by written order published in the State Register on March 14, 2005 (29 SR 1061-1065), June 2, 2008 (32 SR 2148-2154), August 31, 2009 (34 SR 278), December 7, 2009 (34 SR 823-824), July 5, 2016 (40 SR 8), and Oct 11, 2021 (46 SR 436).

Additional sites may be added to this list as new calcareous fens are discovered. Future revisions to the list will be published in the *State Register* and then an updated list will be posted on the Department of Natural Resources [website](#). The Calcareous fen site name is as it appears in the *State Register*, there may be multiple unofficial names for each fen that are not listed here. The Fen ID number is assigned to each fen in the order they are identified. The Fen ID is the same as the Element Occurrence ID (EOID) in the [Natural Heritage Information System](#) database. All the Township directions are north, and all the Range directions are west. Section legal descriptions in this list are necessarily vague due to the potential for protected species within calcareous fens. There is a point shapefile of calcareous fen locations available at the State of Minnesota Geospatial Commons, search for calcareous fens or use this link: [Calcareous Fens - Source Feature Points - Resources - Minnesota Geospatial Commons \(mn.gov\)](#).
