# 2011 Public Stumpage Price Review

Available for download from Minnesota DNR – Forestry at URL:  
<http://www.dnr.state.mn.us/forestry/timbersales/stumpage.html>

## Highlights

In 2011, the sum of all units-of-measure stumpage sold by public agencies totaled 1.96 million cord equivalents with a bid value of \$44 million as compared to 2010 with 1.72 million cord equivalents sold and a bid value of \$37.1 million, a year-over-year volume increase of 14 percent and revenue increase of 18.6 percent.

Average stumpage prices received for all-species pulpwood and bolts increased to \$21.97 per cord in 2011 from \$21.41 per cord in 2010, an increase of 2.6 percent.

In 2011, the public average stumpage price received for aspen was \$25.55 per cord as compared to an average \$25.16 in 2010, a year-over-year increase of 1.6 percent.

The public average red/white/jack pine pulp & bolts stumpage price was \$33.33 per cord in 2011 as compared to \$30.15 per cord in 2010, a year-over-year increase of 10.5 percent.

Figure 1. Public hardwood pulp & bolts stumpage price trends, 2002-11.

Figure 2. Public softwood pulp & bolts stumpage price trends, 2002-11.

For information about the Minnesota Stumpage Price Review, contact: Don Deckard, State Forest Economist, Minnesota Department of Natural Resources, Division of Forestry, 500 Lafayette Road - Box 44, St. Paul, Minnesota 55155-4044. Email: [donald.deckard@state.mn.us](mailto:donald.deckard@state.mn.us); Office: (651) 259-5287.

## Highlights

In 2011, a total 16.4 MMBF of sawtimber was sold by public agencies as compared to 17.5 MMBF sold in 2010, a year-over-year volume decrease of 6.3 percent.

The all-species public average sawtimber stumpage price was \$145.88 per MBF in 2011 as compared to \$115.16 per MBF in 2010, a year-over-year increase of 26.7 percent.

Figure 3. Public sawtimber stumpage price trends, 2002-11.

## Purpose and Methods

This report contains average stumpage prices received by all Minnesota public agencies in **2011** for the following product classifications: sawtimber, pulp & bolts, pulpwood, fuelwood, and biomass. Information presented may be useful for determining the total volume and value of stumpage sold and for comparing relative volumes and values of stumpage sold during the reporting period by public agencies in Minnesota.

The various public agencies have different fiscal years. The reporting period for each agency is included as part of the agencies information. The fiscal year used by the counties is the same as the calendar year. Federal agencies (USFS and BIA) fiscal year runs from October 1 – September 30. The state's (Minnesota DNR) fiscal year runs from July 1 – June 30, but to make the data reported more consistent with the other agencies, the time period for state data included in the report is for **CY2011**. Some agencies report their data based on timber appraisal estimates from timber sales sold, while others report based on actual scale receipts from timber harvested and scaled. The reporting basis for each agency is included in the report.

**DISCLAIMER:** The timber sales data includes different products and units of measure by species. Reported volumes and values are adjusted to account for variability in product specifications at the discretion of the state forest economist. The reader should use caution when comparing the prices shown in this report with actual prices received or expected on any specific timber sale. Individual sale prices may vary significantly from the averages shown in this report because of variability in both economic and physical conditions.

## Definitions

**Average price:** volume weighted (mean) calculated by multiplying the corresponding volume by price for each species/species group and product/product group.

**Biomass:** logging residues including tops, limbs, and cull pieces.

**Board foot:** a piece of wood 1" thick by 12" long by 12" wide.

**Bolt:** short length log, in the Lake States usually 100" in length with minimum 6" top diameter. Depending on species and quality, may be suitable for the production of dimensional lumber (2x4s), industrial grade lumber (pallets), for manufacturing turned forest products, or for peeling.

**Cord:** unit of cubic volume measure 4 feet wide, 4 feet high, and 8 feet long, or equivalent, containing 128 cubic feet of well stacked roundwood, including bark and air space.

**MBF:** one thousand board feet; for stumpage purposes, a unit of volume measured using log or tree scale.

**MMBF:** one million board feet; for stumpage purposes, a unit of volume measured using log or tree scale.

**Pulpwood:** stem suitable for fiber used for paper and oriented strand board (OSB) manufacturing.

**Pulp & Bolts:** stem containing the mixed products of pulpwood and bolts.

**Sawtimber:** stems containing logs suitable for production of graded boards and/or dimensional lumber.

**Stumpage:** the value of standing trees.

## 2011 SUMMARY TABLE – ALL MINNESOTA PUBLIC AGENCIES

All Agencies Reporting Period: Variable				Reporting Basis: Variable
