Environmental Assessment Worksheet  
EQB Monitor Notice

The Minnesota Department of Natural Resources (MDNR) has prepared the attached Environmental Assessment Worksheet (EAW) to describe the environmental effects associated with the proposed Knowlton Creek Stream Restoration project in St. Louis County, Minnesota. The production of this document is mandatory. The MDNR is the Responsible Governmental Unit for the environmental review of this project.

The Minnesota Department of Natural Resources (MDNR) proposes to restore and enhance habitat for trout and associated cold-water organisms, using Natural Channel Design techniques, to stabilize approximately 6,491 linear feet of Knowlton Creek and tributaries in Duluth, Minnesota. This project supports the Lower St. Louis River Area of Concern (AOC) Remedial Action Plan.

A 30-day public review and comment period will begin on July 20, 2015 with the publication of the notice of availability of this EAW in the EQB Monitor. The DNR invites public comments on the EAW during the public review period from July 20, 2015 to August 19, 2015 at 4:30 pm. A copy of the EAW is available for public review at:
