Minerals Exploration Plan on State Nonferrous Metallic Minerals Leases

Submitted by Teck American Incorporated on June 12, 2020 and summarized here by DNR Division of Lands and Minerals

Narrative: Teck American Incorporated (Teck) submitted a plan to facilitate exploration for metallic mineral deposits in St. Louis County. The proposed work would occur about five miles southeast of Babbitt, Minnesota. Teck has actively explored in this area since 2007.

Teck plans to upgrade an existing winter access trail to support all-season access for exploration. Upgrades may include widening the access trail, making slight realignments of the existing winter trail, and adding gravel. Teck also plans to construct an at-grade railroad crossing across a private railroad. These actions will ensure all-season access to Teck’s lease holdings.

Teck indicates it will secure permits and authorizations for stormwater and wetlands impacts, as applicable.

No drilling is proposed.

Exploration is proposed on the following State nonferrous metallic minerals leases: MM-9831-N

Public Land Survey location: Part of Sections 28, 29 and 33 of T60N R12W as shown on Figure 1

Types of exploration activity: Construction of all season access

Expected time period of activity: August 1 through December 31, 2020

Access: Access to sites will be via the existing public and forest road network, and other existing access routes.

Surface ownership: Exploration related activities will occur on DNR-administered state lands. Upon DNR approval, which may include stipulations, work may proceed as described in the exploration plan on state-owned surface lands.

Explorer contact: Leslie Olmstead, (509) 623-4572 or Leslie.Olmstead@teck.com
