

## Exploration plan submitted by Talon Nickel (USA) LLC on September 8, 2023

Summarized here by DNR Lands and Minerals Division

Talon Nickel (USA) LLC (Talon) proposes exploring for metallic minerals in Carlton County in an area three to six miles southeast of Tamarack, Minnesota (Figure 1). Talon and Kennecott Exploration Company (Kennecott) have explored this area intermittently since 2008.

Kennecott, which designated Talon as the operator for the proposed exploration activity, holds the state leases. The Minnesota Department of Natural Resources (DNR) has approved the operating agreement between Kennecott and Talon.

If approved by DNR, Talon will have the right to explore the specified state lands under a nonferrous metallic mineral lease consistent with the exploration plan, any conditions, and applicable laws and rules.

**Description of exploration activity:** Talon proposes diamond or rotary drilling exploratory borings at up to four drill sites and conducting down-hole and ground geophysical surveys. Talon will clearly post drill sites and active survey areas. All exploratory boring activity will follow regulations set by Minnesota Department of Health.

**Access:** Talon will use existing roads and trails as much as possible, but construction or improvement of temporary access trails may be required to safely reach some drill sites. To minimize disturbances, Talon may use composite mats to stabilize trails and drill sites. If access across non-state lands is required to reach the exploration area, Talon will contact surface owners to establish acceptable access prior to beginning proposed activities.

**State nonferrous metallic mineral leases:** MM-9808, MM-9809, MM-9810, MM-9811, MM-9852-N, MM-9853-N, MM-9854-N, and MM-9855-N

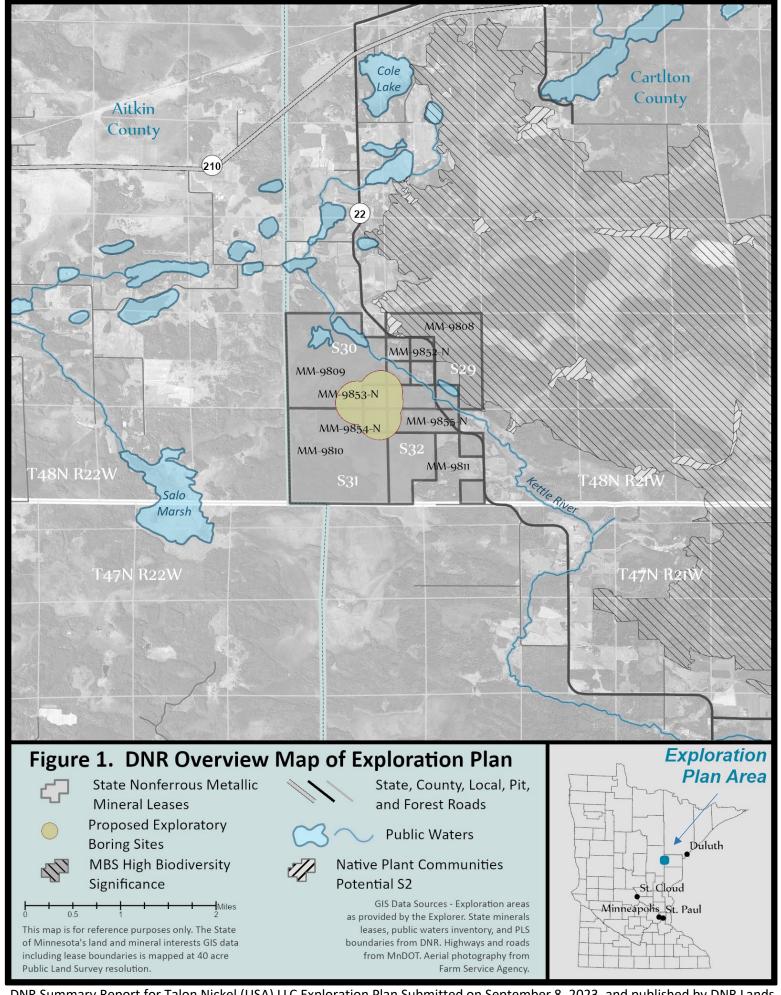

Expected time period: upon approval by DNR through September 1, 2024

**Explorer contact:** Brian Goldner (218) 768-3292 or goldner@talonmetals.com
