Cook Area Gold-in-Till Survey
Division of Lands and Minerals

This map highlights the latest results of a gold-in-till survey within the Cook Area of Northern St. Louis County. Nineteen (19) glacial sediment samples were collected by DNR in October 2015 and shipped to a third-party laboratory (ODM) for processing and gold grain counts. Results from previous sampling events are shown in the background.

Number of Gold Grains (normalized to 10kg sample wt)
