U.S. Army Corps of Engineers, St. Paul District

1997; 263 pages, unclassified.

Bogs, Wet Meadows, Wetland Communities, Marshes, Swamps, Wetland Plants, Hydrophytes, Fens

The wetlands of Minnesota and Wisconsin are categorized into fifteen plant communities. Each community is described and illustrated by color photographs, along with descriptions, color photographs and ink drawings of 144 representative plant species. The descriptions include taxonomic characteristics, habitat, and notes on wildlife use and economic values.
