ROOT RIVER STATE WATER TRAIL

MAP 2 - RUSHFORD TO THE MISSISSIPPI RIVER

m MINNESOTA
STATE PARKS AND TRAILS

ABOUT THE ROOT RIVER WATER TRAIL

The branches of the Root River join into one and the river straightens as the valley broadens considerably. The scenery then settles into a gentle plain of pastureland and mixed cottonwood and maple with wooded rolling hills visible in the distance.

The Root River has a gentle to moderate flow with some riffles at various stretches. From Chatfield to the Mississippi River the river falls 310 feet for an average drop of 3.4 feet per mile. River levels peak in mid-March and once again in early June. Water levels also vary substantially with rainfall.

Natural life along the Root River is as diverse as anywhere in the state. Wooded shores harbor mammals such as white-tailed deer, gray fox, red fox, coyote, raccoon, woodchucks, squirrels, weasels, and badgers. The eastern edge of the river flows through the Upper Mississippi River Wildlife and Fish Refuge, which spans over four states and encompasses one of the largest blocks of floodplain habitat in the United States.

Flat water greets paddlers along much of this route.

TRIP PLANNING AND SAFETY

- Plan your trip with a map before you leave. Tell someone your plans, including put-in and take-out times.
- Travel with a companion or group.
- Most people paddle 2-3 river miles per hour.
- River levels can affect your speed and trip safety. Check conditions at mndnr.gov/river_levels.
- Don't underestimate the power of wind and waves, especially on large lakes.
- Be cautious of obstacles in the river and avoid overhanging and dead trees.
- Bring clean drinking water and a waterproof container with a first aid kit, waterproof matches and extra clothes.
- Wear a life jacket at all times while on the water.
- Purchase a license for your non-motorized watercraft if it's more than 10 feet in length. If you're not from Minnesota, check your state's watercraft license laws.

WATERCRAFT CAMPING

- Camp only in designated campsites, which are often available on a first-come, first-served basis.
- Riverbed camping next to private property is not permitted.
- Stay off private property. Stop only at designated sites; much of the shoreland is private property.
- Be sanitary! Use designated toilet facilities or bury human waste away from the river.
- Follow the rules for firewood. State forests allow you to gather dead wood for a fire, but state parks do not.

AREA OVERVIEW

RECOMMENDED DAY TRIP

Rushford to Houston

- Put-in location: River mile **33.8**
- Take-out location: River mile **18.7**
- Length: **15.1** river miles

This stretch connects two quaint cities with a mixture of wooded areas and farmlands in between. Both cities offer parks with hiking trails, hilly areas along the Root River State Trails with beautiful overlooks, food stops, and overnight lodging. In addition, Houston is home to the International Owl Center.

EXPLORE ON SHORE

Root River State Trail

This paved, 42-mile state trail, begins in Fountain and runs through to Houston.
mndnr.gov/rootriver

International Owl Center

An educational center dedicated to inspiring visitors to get involved in the conservation of owls.
internationalowlcenter.org

Upper Mississippi River National Wildlife and Fish Refuge.

Fishing, hunting and birdwatching are big activities in this expansive refuge.

PROTECT THE RIVER

Your experience on the river depends on a healthy environment. As you explore the beauty of this waterway, also do your best to protect it.

Protect Your Waters

- Before launching...before leaving
- Clean off aquatic plants and animals.
 - Drain all water away from the landing.
 - Dispose of unwanted bait in the trash.

mndnr.gov/invasives/aquatic

Buffer Protection

The Minnesota buffer law establishes new vegetation buffers along rivers, streams and ditches to help filter out chemicals and sediment before they reach waterways.
