ABOUT THE PARK

Afton State Park was established in 1969 for visitors to experience unique natural features and enjoy outdoor recreation. Just forty minutes east of the Twin Cities, the park lies along bluffs overlooking the St. Croix River. Here you will see wildflowers and grasses in restored prairies that were once agricultural fields. Below, outcrops of limestone jut from the sides of deep, forested ravines that drop three hundred feet to the river. Make your way down to the water's edge and watch for wildlife. The park's diverse habitats make it a birdwatcher's haven with over 190 species, some of which are rare.

Explore from the top of the park's bluffs to the edge of the river.

TRAIL HIGHLIGHTS

All distances are from the park visitor center.

North River Trail

Flat • Crushed gravel

0.8 miles one-way

Rolling terrain • Mowed grass • Shared with horseback riders seasonally

2.1-mile loop

Circle the park's largest open area and get a good idea of what the prairies looked like 500 years ago. Experience views of the river valley and the Afton Alps Ski Area. Set out on this trail by foot in summer or skis in winter.
