ABOUT THE PARK

St. Croix is Minnesota's largest state park with over 33,000 acres of forests, meadows, marshes and streams. Established in 1943, the park was originally developed by the Civilian Conservation Corps as a recreation demonstration area. This location has been valued for thousands of years, from the first nations to Dakota and Ojibwe tribes, fur traders, loggers, settlers and modern recreationists.

While you are here, be sure to spend time on the St. Croix National Scenic Riverway and the Kettle River State Wild and Scenic River. Look for wildflowers, catch a fish, or go birding. As you explore, you may notice that storm-affected forests within the park are undergoing habitat restoration.
