**Study Questions**

**to “Hurrah for Muskrats!”**

*Minnesota Conservation Volunteer* magazine is your guide to wild things. Every other month, six times a year, the magazine arrives in your school library. Each one has a story for Young Naturalists like you. Are you curious about wild things? Young Naturalists tells true stories that can answer all kinds of questions such as these—

Have you ever heard of a purple wartyback? How about a pink heelsplitter, pimpleback, or monkeyface? All are Minnesota freshwater mussels. Read Young Naturalists stories to learn which species (kinds) of critters live in Minnesota—frogs, salamanders, snakes, wild cats, wild dogs, weasels, mice, and rabbits.

Want to peek inside the den of a red fox and see how the kits grow up? Are you a rock hound searching for agates? Have you ever wondered what's alive under snow? How animals see? Why is a bluebird blue? How birds fly?

Would you like to hear the true story of giants of the ice age? Young Naturalists also tells you about the underground universe. You can read the story of a tiny owl that went to a hospital with an injured wing. Find out about a boy who worked in a logging camp. Read the story of Ojibwe children today hunting and gathering like their ancestors did.

Learn how to get started camping, snowshoeing, ice fishing, or canoeing.

Find these stories and more online at [www.mndnr.gov/young_naturalists](http://www.mndnr.gov/young_naturalists).

*Your knowledge of wild things helps you explore and enjoy the outdoors. Have fun!*
“Hurrah for Muskrats!” Study Questions

Study and learn facts and ideas based on this Young Naturalists nonfiction story in Minnesota Conservation Volunteer, July–August 2020, www.mndnr.gov/mcvmagazine.

1. Where in North America do muskrats live? ____________________________

2. What kind of animal is a muskrat?
   a. rodent  
   b. amphibian  
   c. primate  
   d. canid

3. According to the article, what is one trait all rodents share? ____________________________

4. True or False: Muskrats have webbed feet that help them swim.

5. How does a muskrat’s underfur help it survive?
   a. It helps keep the skin warm and dry
